55 People Died in US After Receiving COVID-19 Vaccines: Reporting System

BY ZACHARY STIEBER | January 16, 2021 Updated: January 16, 2021

Fifty-five people in the United States have died after receiving a COVID-19 vaccine, according to reports submitted to a federal system.

Deaths have occurred among people receiving both the Moderna and the Pfizer-BioNTech vaccines, according to the reports.

One man, a 66-year-old senior home resident in Colorado, was sleepy and stayed in bed a day after getting Moderna's vaccine. Early the next morning, on Christmas Day, the resident "was observed in bed lying still, pale, eyes half open and foam coming from mouth and unresponsive," the VAERS report states. "He was not breathing and with no pulse."

In another case, a 93-year-old South Dakota man was injected with the Pfizer-BioNTech vaccine on Jan. 4 around 11 a.m. About two hours later, he said he was tired and couldn't continue with the physical therapy he was doing any longer. He was taken back to his room, where he said his legs felt heavy. Soon after, he stopped breathing. A nurse declared a

Utah woman, 39, dies 4 days after 2nd dose of COVID-19 vaccine; autopsy ordered

by HEIDI HATCH | KUTV Staff
Wednesday, March 10th 2021

SALT LAKE CITY (KUTV) — During a [KUTV investigation into COVID-19 vaccine side effects](#) and where to report them, we found four reported deaths, filed by Utah families and their caregivers to the CDC's Vaccine Adverse Effects Reporting System.

One case stood out, a [39-year-old single mom from Ogden](#) who died four days after her second dose of the Moderna COVID-19 vaccine. Her family, who is now waiting on an autopsy, held a celebration of life for her this past weekend.

Kassidi Kurill, by all accounts, was healthy, happy and "had more energy" than just about anyone else around her. Her family told 2News she had no known health problems or pre-existing conditions.

Four days after Kurill's second dose of the COVID-19 vaccine, she was gone — dead before most of her family could say their goodbyes.

"She came in early and said her heart was racing and she felt like she need to get to the emergency room," Hawley said.

"They did a blood test and immediately came back and said she was very, very sick, and her liver was not functioning," Hawley said.

Kurill was flown to Intermountain Medical Center in Murray, a trauma center where they had the ability to do transplants if needed. Her liver was failing and a transplant, doctors believed, was her best option at survival.

She died, he said, 30 hours after they arrived in the emergency room.

Two healthy 28-year-olds die within days of shot

Shauna O'Neill Link

Stacey Ann Tiano I beg your pardon Miss Know It All. My 28 year old daughter took the vaccine on a Tuesday and was dead by Thursday. You have no idea what the hell you are talking about. Autopsy shows no other red flags. Corner has assured us he will get to the bottom of this vaccine crap.

Haley Link Brinkmeyer

1992 - 2021

Evansville - Haley Link Brinkmeyer, 28, of Evansville, Indiana, passed away on Thursday, January 21, 2021 at her home.

Haley was born on August 4, 1992, the youngest daughter of Shauna (O'Neill) and Steve Link. She attended Cynthia Heights Grade School, Helfrich Park Middle School and graduated from Reitz High in 2011. She and her future husband, Evan were crowned basketball homecoming queen and king at Reitz. Haley had a competitive spirit and played soccer, softball and basketball. Her coaches had a strong impact on her life, they were like family to her. She graduated from University of Evansville in 2018 with a doctorate in physical therapy and was a member of AOII Sorority and participated in the Buddy Program. She worked at North River Health Campus.

28-Year-Old Mother Has Fatal Stroke 5 Days After COVID Vaccine

Just five days after the second dose of the Pfizer COVID-19 vaccine, perfectly healthy 28-year-old health care worker Sara Stickles had aneurysm. "Today around 1:45 she had what looks like a brain aneurysm and is in a very deep coma." wrote her twin sister Kara Stickles. Sara, who was a health care worker and just began a position at Swedish American Hospital in Wisconsin, remained on life support before passing away. She leaves behind a young son.

More deaths within minutes / hours of vaccine

Gloucester resident dies within hours of receiving Pfizer vaccine

58-year-old Gloucester resident Drene Keyes was a gifted singer, a mother and grandmother of six.

Unexpectedly, Lisa lost her mother on Saturday within a couple of hours after Keyes received the Pfizer vaccine in Warsaw.

"Right before she left, I was helping her put her shoes on," she said.

Keyes had diabetes, sleep apnea and was obese. Her job made her eligible for the first dose. So, on Saturday, Keyes got the Pfizer vaccine and spent 15 minutes in the mandatory observation period.

The coworker she was with said she was trying to get in the car and said, "Something is not right. Something's not right."

She was quickly rushed to Riverside Appahannock Hospital.

"They tried to remove fluid from her lungs. They called it 'flash pulmonary edema,' and doctors told me that it can be caused by anaphylaxis," said Jones. "The doctor told me that often during anaphylaxis, chemicals are released inside of a person's body and can cause this to happen."

Jones believes more research needs to be done, especially for those with underlying health issues.

"Why are we allowing people with underlying conditions to be guinea pigs for a vaccine that is still in clinical trials and emergency use?"

Jones questioned.

The family was denied an autopsy by public health officials

Former Detroit TV Anchor Dies One Day After Taking COVID Vaccine

(CBS DETROIT) - Karen Hudson-Samuels' career in broadcast journalism spanned over four decades in Detroit.

The Detroit media icon was found dead at her home by her husband last Tuesday, just one day after taking the COVID-19 vaccine but the official cause of her death is still unknown.

NY man dies shortly after vaccination

By Luke Funk | Published 7 hours ago | Updated 6 hours ago | Coronavirus Vaccine

NEW YORK - A man died shortly after receiving a COVID-19 vaccination at the Javits Center in Manhattan but it was not believed to be due to an allergic reaction, state officials say.

The man, in his 70s, collapsed as he was leaving the vaccination site on Sunday morning.

"On-site security and first responders were by his side within seconds, but sadly the man passed away a short time later at a hospital," New York State health Commissioner Howard Zucker said in a statement to [Fox5NY.com](https://www.fox5ny.com).

The incident occurred approximately 25 minutes after he was vaccinated, and following the required 15 minute observation period.

CA woman, 78, gets COVID-19 vaccine, then suddenly dies of something else ???

By Elizabeth Elizalde

February 14, 2021 | 12:23am |

The woman "passed away unexpectedly" Friday after receiving [Pfizer's](#) version of the [Covid-19](#) vaccine about noon at the Kaiser-run site at Cal Poly Pomona, 30 miles east of downtown Los Angeles, the doctor said.

"While seated in the observation area after the injection, the patient complained of feeling discomfort and while being evaluated by medical personnel, she lost consciousness," he said. "Paramedics on scene began CPR almost immediately and continued, but she ultimately could not be revived."

She required CPR within 15 minutes of shot but media claims her death was not related to vaccine (without evidence or autopsy results)

Healthy 68 year-old dies within 24 hours of shot

March 23 - gets shot —————→ March 24 - dead

by: KSNT News

EFFINGHAM, Kan. (KSNT) – An obituary posted online Wednesday night states that a Kansas woman died after a reaction to the coronavirus vaccine, according to KSNT News.

The first line of Jeanie Evans' obituary states, "Jeanie M. Evans, 68, of Effingham, Kansas died unexpectedly on Wednesday, March 24, 2021, at the Stormont-Vail Hospital from a reaction to the Covid vaccine."

Evans received her shot the day before her death in Ozawie at the Keystone Early Learning Center.

Once she started experiencing a reaction to the vaccine, Evans was taken by ambulance to Topeka's Stormont Vail Hospital.

Evans was pronounced dead at the hospital, a day after receiving her first COVID-19 shot.

The Kansas Department of Health and Environment confirmed it is investigating the death alongside federal partners.

13 people died during Moderna's COVID vaccine trial

The evidence presented listed 13 deaths in the trials, with 6 deaths being people who had taken the vaccine, and 7 those who had received the placebo.

Nine health workers have died in vaccine rollout. India must disclose status of probe into each case

The deaths of nine health workers following administration of the Covid-19 vaccine in the 12 days since the start of the immunisation programme on January 16 is cause for concern.

The deaths were reported from Uttar Pradesh, Karnataka, Andhra Pradesh, Rajasthan, Telangana, Gurugram and Odisha. The six men and three women who died were between 27 and 56 years old. The deaths took place between 24 hours and five days of taking the vaccines and all have been ascribed to cardiovascular problems or "brain stroke".

Six people died in Pfizer's late-stage trial of the COVID-19 vaccine, the US Food and Drug Administration has revealed just hours after Britain became the first country in the world to roll out the vaccine.

Priest who volunteered for COVID-19 vaccine trial passes away

Sat, 12/05/2020 - 01:56 — legitgov

Priest who participated in trial for Moderna vaccine dies suddenly | 02 Dec 2020 | A Ukrainian Greek-Catholic priest, who was previously a volunteer in the testing of Moderna's COVID-19 vaccine, has died suddenly in his home. It is still unclear if the 70-year-old's death is related to the vaccine. Fr. John Fields was the Communications and Religious Education Director for the Archeparchy of Philadelphia, which is part of the Ukrainian Greek-Catholic Church. Announcing his death, the Archeparchy stated that Fr. Fields "has passed away in his home. The cause of death is yet to be determined." Fr. Fields turned 70 this year. Just recently, Fields had participated in the trials of Moderna's COVID-19 vaccine, after receiving an email from the University of Pennsylvania at the end of August, asking if he wished to "participate in the third and final phase" of the vaccine trial.

Volunteer in AstraZeneca COVID-19 vaccine trial dies in Brazil: officials

By Noah Manskar and Jackie Salo

October 21, 2020 | 1:47pm

A Brazilian volunteer in the AstraZeneca COVID-19 vaccine trial has died, health officials announced Wednesday.

The Federal University of Sao Paulo, which is helping coordinate phase 3 clinical trials in the country, also confirmed the death.

The patient was identified as Joao Pedro Feitosa, a 28-year-old doctor in Rio de Janeiro who had been on the frontlines of the COVID-19 pandemic,

AstraZeneca used Meningitis vaccine as their 'placebo' for those who claim Joao received the placebo.

Swiss Patient Dies Shortly After Receiving Pfizer COVID Vaccine

Death of Florida doctor after receiving COVID-19 vaccine under investigation

Karen Weintraub USA TODAY

Published 9:00 p.m. ET Jan. 6, 2021 | Updated 9:26 a.m. ET Jan. 7, 2021

A Florida doctor has died several weeks after receiving a COVID-19 vaccine, although it's not yet clear whether his death Monday was related to the shot he received on Dec. 18.

Dr. Gregory Michael, 56, an OB-GYN at Mount Sinai Medical Center in Miami Beach, died after suffering a hemorrhagic stroke apparently resulting from a lack of platelets.

In a [Facebook post](#), Michael's wife, Heidi Neckelmann, said he sought emergency care three days after the shot because he had dots on his skin that indicated internal bleeding.

Heidi Neckelmann

January 5 at 11:00 PM · 🌐

The love of my life, my husband Gregory Michael MD an Obstetrician that had his office in Mount Sinai Medical Center in Miami Beach Died the day before yesterday due to a strong reaction to the COVID vaccine.

He was a very healthy 56 year old, loved by everyone in the community delivered hundreds of healthy babies and worked tirelessly through the pandemic.

He was vaccinated with the Pfizer vaccine at MSMC on December 18, 3 days later he saw a strong set of petechiae on his feet and hands which made him seek attention at the emergency room at MSMC. The CBC that was done at his arrival showed his platelet count to be 0 (A normal platelet count ranges from 150,000 to 450,000 platelets per microliter of blood.) he was admitted in the ICU with a diagnosis of acute ITP caused by a reaction to the COVID vaccine. A team of expert doctors tried for 2 weeks to raise his platelet count to no avail. Experts from all over the country were involved in his care. No matter what they did, the platelets count refused to go up. He was conscious and energetic through the whole process but 2 days before a last resort surgery, he got a hemorrhagic stroke caused by the lack of platelets that took his life in a matter of minutes.

I believe that people should be aware that side effects can happen, that it is not good for everyone and in this case destroyed a beautiful life, a perfect family, and has affected so many people in the community Do not let his death be in vain please save more lives by making this information news.

Johns Hopkins Scientist: 'A Medical Certainty' Pfizer Vaccine Caused Death of Florida Doctor

Dr. Jerry L. Spivak, an expert on blood disorders at Johns Hopkins University, told the New York Times Tuesday that he believes "it is a medical certainty" that Pfizer's COVID vaccine caused the death of Dr. Gregory Michael.

Autoimmune means that something in the vaccine may be provoking the body to create antibodies to its own platelets, could be because of molecular mimicry, or cross reactivity between proteins.

ITP has been documented to occur after the MMR vaccine, as well as influenza vaccines, DTP vaccine and hepatitis A vaccines.

Why was no one warned that immune thrombocytopenia is a reaction to the COVID vaccine?

The New York Times

A Few Covid Vaccine Recipients Developed a Rare Blood Disorder

By Denise Grady

Feb. 8, 2021 Updated 5:07 p.m. ET

One day after receiving her first dose of Moderna's Covid vaccine, Luz Legaspi, 72, woke up with bruises on her arms and legs, and blisters that bled inside her mouth.

She was hospitalized in New York City that day, Jan. 19, with a severe case of immune thrombocytopenia — a lack of platelets, a blood component essential for clotting.

The same condition led to the death in January of Dr. Gregory Michael, 56, an obstetrician in Miami Beach whose symptoms appeared three days after he received the Pfizer-BioNTech vaccine. Treatments failed to restore his platelets, and after two weeks in the hospital he died from a brain hemorrhage.

"I think it is possible that there is an association," Dr. James Bussel, a hematologist and professor emeritus at Weill Cornell Medicine who has written more than 300 scientific articles on the platelet disorder, said in an interview. "I'm assuming there's something that made the people who developed thrombocytopenia susceptible, given what a tiny percentage of recipients they are."

He added: "Having it happen after a vaccine is well-known and has been seen with many other vaccines. Why it happens, we don't know."

Ms. Legaspi was strong and in good health before receiving the Moderna vaccine. But when she was admitted to the city hospital in Elmhurst, Queens, her platelet count was zero. Normal readings range from 150,000 to 450,000, and anything under 10,000 is considered very dangerous and in urgent need of treatment.

Doctors ordered Ms. Legaspi to not even get out of bed without help, for fear that if she fell and injured herself she could hemorrhage. They began giving her the standard treatments, including platelet transfusions along with steroids and immune globulins meant to stop her immune system's war on her platelets.

Nothing worked. Her platelets would rise a bit and then crash again between treatments.

As the days passed with no progress, Ms. Legaspi's daughter, aware of Dr. Michael's death, worried increasingly that her mother would suffer a brain hemorrhage.

"I don't think she understands she's like a ticking bomb," the daughter said in an interview on Jan. 28, after her mother had been in the hospital for more than week with no improvement. "I don't use the term. I don't want to tell her that."

Dr. Gregory Michael

Ms. Legaspi,

Another vaccine recipient, Sarah C., 48, a teacher in Arlington, Tex., received the Moderna vaccine on Jan. 3. She asked that her full name not be used to protect her privacy.

Two weeks later, she began to have heavy vaginal bleeding. After two days she saw her obstetrician, who ordered blood work and scheduled other tests. A few hours later, he called and urged her to go straight to the emergency room. He was stunned and hoped it was a lab error, but her blood count showed zero platelets. She had had a checkup with completely normal blood-test results less than a week before being vaccinated.

The reading of zero platelets was not a lab error. The results were confirmed in the emergency room, and doctors there also noticed red spots on her wrists and ankles, caused by hemorrhages under the skin. Sarah C. had seen the spots, but ignored them.

She spent four days in the hospital, receiving platelet transfusions, immune globulins and steroids to restore her platelet count.

She described the experience as terrifying. "Especially when people say they'd never seen this before, that you could bleed out or hemorrhage," she said. "That was the biggest concern, and just not knowing. The gentleman in Florida, he didn't make it. Certainly the fear was there."

If she had known enough to recognize the red spots and bleeding as danger signs, she said, she would have gone to the emergency room much sooner.

Health care worker dies after second dose of COVID vaccine, investigations underway

Tim Zook's last post on Facebook brimmed with optimism. "Never been so excited to get a shot before," he wrote on Jan. 5, above a photo of the Band-Aid on his arm and his COVID-19 vaccination card. "I am now fully vaccinated after receiving my 2nd Pfizer dose."

Zook, 60, was an X-ray technologist at South Coast Global Medical Center in Santa Ana. A couple of hours later, he had an upset stomach and trouble breathing. By 3:30 p.m. it was so bad his colleagues at work walked him to the emergency room. "Should I be worried?" his wife, Rochelle, texted when she got the news. "No, absolutely not," he texted back. "Do you think this is a direct result of the vaccine?" she typed. "No, no," he said. "I'm not sure what. But don't worry."

There were suspicions of COVID and a diagnosis of congestive heart failure. Zook was put on oxygen, then — just four hours later — a BiPAP machine to help push air into the lungs. Multiple tests came back negative for COVID.

Shortly after midnight on Jan. 7, the hospital called. Zook was in a medically induced coma and on a ventilator to help him breathe. But his blood pressure soon dropped and he was transferred to UC Irvine Medical Center. "On Friday I get a call, 'His kidneys are failing. He needs to be on dialysis. If not, he could die — but there's also a chance he might have a heart attack or stroke on dialysis because his blood pressure is so low,'" Rochelle Zook said.

By 4 a.m. Saturday, Jan. 9, Zook had gone "code blue" twice and was snatched back from the brink of death. There was a third code blue in the afternoon. "They said if he went code blue a fourth time, he'd have brain damage and be a vegetable if he survives," Rochelle Zook said.

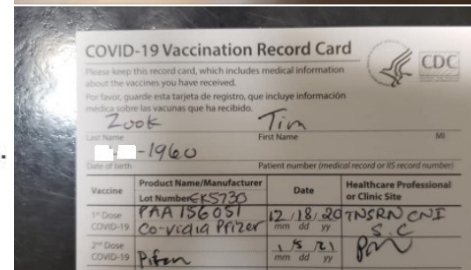

Later that day, Tim Zook died.

Will employers accept liability for their front-line workers' deaths if they require the shot in order to work?

39-year-old nurse aide dies 'within 48 hours' of receiving mandated COVID-19 shot

HURON, Ohio, January 27, 2021 (LifeSiteNews) — A 39-year-old woman with no known comorbidities died unexpectedly in northern Ohio within 48 hours of receiving a COVID-19 vaccine, which was reportedly required by her employer.

Janet L. Moore, a nurse aide at Admirals Pointe Nursing Home (APNH) in Huron, was found unresponsive in her car outside her apartment complex on December 31 around 8:00 p.m., her brother Jacob Gregory told LifeSiteNews.

"She was coming home from work and as soon as she drove into her parking lot she passed away," he said. "According to her neighbors she wasn't feeling good directly after the vaccine, and then ever since the vaccine she was actually feeling nauseated, she'd have like migraines and stuff like that. And then, within 48 hours, she ended up passing away."

Gregory mentioned that his deceased sister, a mother of two sons, was required to receive this vaccine due to her nursing home employment.

A nursing home in Janesville, Wisconsin, which mandated their employees receive these experimental biological agents did in fact lay off workers who declined the injections.

Nearly a dozen employees were forced from their jobs due to the policy, and 27 wrote letters of complaint seeking to have the policy changed.

Their concerns included how this biological agent, which was rushed through development and testing, may have dangerous, unknown long-term effects, while others expressed worries about it affecting their pregnancy or fertility.

More generally they objected to being told they had to take a vaccine which was not approved by the Food and Drug Administration (FDA). While these vaccines have been given emergency use authorization by the FDA, neither has the full approval of the agency.

The U.K. government issued a 10-page report late last year that warned coronavirus vaccines should not be used by pregnant or breastfeeding mothers. With regard to their impact on fertility, the document simply states it is "unknown whether COVID-19 mRNA Vaccine BNT162b2 has an impact on fertility."

Safety concerns with these vaccines also include "allergic" and "potentially fatal reactions," that they may actually cause an increased vulnerability to the virus, and that, indeed, worries over long-term effects remain legitimate as these vaccines lack proper testing.

In addition, the FDA also drew up a document this fall listing the possible side-effects from a COVID-19 vaccine, including strokes, encephalitis, auto-immune disease, birth defects, Kawasaki disease, and death.

Auburn Woman Warns Grandfather's Aid Die After COVID Vaccine

By Marissa Perlman January 25, 2021 at 12:45 pm Filed Under: Coronavirus, Placer County

AUBURN (CBS13) – The Placer County Sheriff's Office announced Saturday that a person tested positive for the virus in late December and died hours after getting the vaccine on Thursday.

Now, there are questions from the community on the safety of the vaccine. An Auburn woman says she witnessed the tragedy first hand.

In a post on Facebook, she said she saw her grandfather's aid, a 56-year-old man, get the vaccine at a senior living facility on Thursday.

"Twenty minutes later he realized his legs felt tingly and he was having shortness of breath. He was wheeled out in an ambulance...1 hour later he was in ICU on a ventilator and three hours later he passed away," she wrote.

Hidalgo woman, 75, dies 40 minutes after receiving Covid vaccination

Several media outlets reported that the woman died 15 minutes after receiving a dose of the Chinese-made Sinovac at a vaccination center in Metepec but the federal Health Ministry said that she passed away 40 minutes after inoculation.

According to the newspaper *Milenio*, the woman began to feel weak minutes after receiving the vaccine and fainted when she got up to go to the washroom. She was taken to an IMSS clinic in Metepec but was dead on arrival.

Nurse dies in Georgia after being vaccinated with AstraZeneca

Bakradze was vaccinated on March 18 at 12:15 (local time), and then gave an interview to a local media stating that "vaccines are needed, we are powerless against the virus, we must vaccinate ourselves to avoid diseases or not get seriously ill. Although people are afraid, there is nothing dangerous about getting vaccinated. I urge everyone to get vaccinated."

The day after receiving the injection with the AstraZeneca, the young nurse fell into a coma in a hospital in the Georgian city of Ajaltsije, and despite the fact that that night had stabilized, this Friday her heart stopped and the doctors were unable to revive her.

DR KESHAV Sharma, son of late Chief Justice Satnarine Sharma, has died.

Details of his death are not yet known and relatives are awaiting the results of an autopsy since he was not ailing.

Doctor Kershav Sharma a respiratory consultant who practiced in Wexford hospital took the vaccine on Tuesday 5th of January 2021.

Young Wexford respiratory consultant dies suddenly

By Peter Doyle 18th January 2021

The son of a former Trinidad and Tobago Chief Justice was only 39 years old

Tributes have been paid to a young respiratory consultant who died suddenly.

Dr Keshav Sharma was 39 years of age when he passed away last week (January 11), three days after his birthday.

He was a consultant respiratory and general medical physician at Wexford General Hospital (WGH).

A spokesperson for the Ireland East Hospital Group has confirmed to *Irish Medical Times* that the death was not related to Covid-19.

Obituary

Brittany Hall Perez passed away on January 13, 2021 in Woodstock, Georgia at the age of 39. Born in Huntsville, Alabama on July 16, 1981, Brittany was always a free spirit and opened her heart to all. She grew up "on the other side of the mountain" with her mother, father, and two sisters, and she went through the school years loving music and going to concerts.

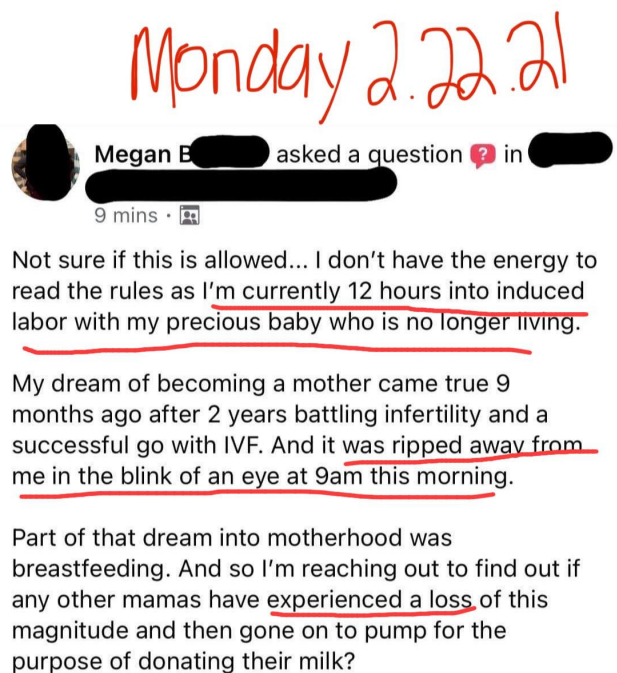

Brittany is survived by: her husband, Chris; their two daughters, Zoey and Maddie; her parents, Ed and Wanda Hall; her two sisters,

Roni Hooker Sisk
February 1, 1974 - February 16, 2021

It is with a heavy heart and much sorrow we create this fund. **Roni Sisk** has been the beloved Director of Nursing at Princeton for a couple of years & has worked in the healthcare community for many years. The Princeton team & greater ClearView family woke up today to learn the devastating news that Roni passed away, very unexpectedly, early this morning (2.16.21). She was only in her mid 40's. She had a husband, children (young & adult),

Healthy 32-year-old goes into cardiac arrest & dies less than 24 hours of J&J shot

March 13 - gets shot

March 14 - dead

**Benjamin G.
Goodman**

Benjamin Goodman went to a Walgreens pop-up COVID-19 "vaccine" clinic in Chelsea, New York on Saturday, March 13. He received the Johnson & Johnson shot, according to his stepmother Pamela Goodman. Benjamin texted his father, Jeff Goodman, and told him he received the shot. Benjamin had a severe headache and started feeling ill. He fell asleep, hoping the symptoms would pass after some rest. Mr. Goodman woke up at 1 a.m. with a high fever and chills. His fiancée, Lindsay Janisse, was awakened to Mr. Goodman having seizures at 4 a.m.. Ms. Janisse called 911 as Mr. Goodman went into cardiac arrest. Paramedics tried, unsuccessfully, to revive him on the scene. Mr. Goodman was rushed to a nearby Mount Sinai Hospital. But he was pronounced dead at 6:05 a.m. Sunday morning, March 14.

Dear friends, there is nothing that can bring our son Ben back. Jeff, Natasha , Carson and I cannot let the truth of what happened to Ben pass with any of you thinking he had some type of underlying health problems that caused his death. He didn't. Ben just celebrated his 32nd birthday, was working full time, golfing, traveling and living the best life he could in NYC. Ben knew our family history with vaccines. He knew. But everyone has been pushing the experimental travel pass and so many things we know and many others do not.

We are very aware and respect every persons choices and medical freedom. This is what happened to our son. There is no B/W or grey, the autopsy came back suspicious and inconclusive pending further investigation.
We don't need to wait for anything, we already know what happened. Nothing can bring him back.

NEW YORK POST

23 die in Norway after receiving Pfizer COVID-19 vaccine: officials

By Amanda Woods

January 15, 2021 12:12pm

EURONEWS NOW

STEINAR MADSEN
CHIEF PHYSICIAN, NORWEGIAN MEDICINES AGENCY

Twenty-three people died in Norway within days of receiving their first dose of the Pfizer COVID-19 vaccine, with 13 of those deaths — all nursing home patients — apparently related to the side effects of the shots, health officials said.

Common reactions to the vaccine, including fever and nausea, "may have contributed to a fatal outcome in some frail patients," Sigurd Hortemo, chief physician at the Norwegian Medicines Agency, said in a Friday statement.

All 13 were nursing home patients and at least 80 years old. While officials aren't expressing serious concern, they are adjusting their guidance on who should receive the vaccine.

The news comes just over a week after officials reported the deaths of just two nursing home residents after they received the Pfizer jab.

An elderly Israeli man died on December 28 of a heart attack after receiving the Pfizer coronavirus vaccine, the Israeli Health Ministry reported.

The Arutz Sheva Newsletter - Updates, stories and features

Subscribe now

It should be noted that in the three weeks since the start of the coronavirus vaccination campaign, two elderly people died a few hours after receiving the vaccine, but the Ministry of Health estimated that there was no connection between the deaths and the vaccine.

In the first case, a 75-year-old man, a resident of Beit She'an, died as a result of heart failure two hours after the injection. The next day, an 88-year-old man collapsed in his home hours after the vaccination and was later pronounced dead. The Hadassah Mount Scopus

Sharing in hopes of saving someone else's life... My dad died 72 hrs after receiving the Moderna jab. He was 75. He was not in perfect health, but was living a normal, productive life, cutting almost 20 acres of property, eating healthy, hanging out with his friends, golfing, and was supposed to leave for a 6 week vacation w my mom next week. He got the shot on Tuesday about 11:50am. He spent the afternoon hanging out with friends (had a few cocktails) and then cut grass for a couple hrs. That evening he was feeling achy and tired. Within 24 hrs his symptoms included nausea, vomiting, diarrhea, anorexia, back pain, dizziness, poor color, and fatigue. This continued for 2 days. He tried to drink water and stay hydrated, he was not able to eat. Thursday night he had extreme diarrhea. We also noticed he was having trouble picking up his feet to walk, he was shuffling his feet and unstable. He did not say anything to us, he thought he had a stomach bug. He had some OJ Friday morning. My mom left to run errands and when she came home at lunchtime, she found my dad, he was already gone. Basically, he was sick within hrs of the jab and dead in 72 hrs post jab. Not a coincidence.

Julie Marie Christensen

2d · 🌐

Jerry and I experienced the sudden tragic loss of my mother. She lost her ability to walk, stand, move, talk, eat, drink, and breathe following the Covid-19 vaccine. Her death happened so fast. I'm devastated, and I wasn't sure how to share this shocking news. This is my mother's experience, not a subject of debate anti or pro this or that. It is what has happened to my mother. Norway has stopped offering the vaccine to people 80 or over after sudden deaths post-vaccination. My mother was exactly one month from her 80th birthday, had no underlying health conditions, and like a light switch, became unresponsive.

Please please everyone be cautious with your loved ones who are having the Covid 19 vaccine. We are still waiting for the post mortem for my mum but I am CONVINCED that she had a reaction to it. She was fine and well Saturday after having the vaccine at 11:20 she started feeling unwell shivering and dizzy Saturday night. Went to bed 8pm and never woke up. Please please warn your loved ones. Get them to question how it reacts to other medication. I'll never know the truth but I'm utterly convinced that's why my wonderful mum has left us so suddenly. Please don't let this hell We are in impact your life also 🙏🙏🙏

Reactions and Feedback

January 28 at 5:32 AM · 🌐

I will tell you what happened to my Dad. He died last Tuesday. No underlying health problems and 100% fit. Day 4 after Pfizer vaccine he got double vision. It wouldn't shift so my Mum took him to A & E. CT scan of his head, showed no problems. Full MRI scan of his body showed no problems anywhere. They said his vision would improve..it didn't! He couldn't even walk straight, read or watch tv. Day of 2nd Pfizer vaccination...by the evening felt very ill..got worse as the days went on. Pains, aches that he'd never had before. Totally fit man with no heart problems or anything else. Day 4 of 2nd Pfizer vaccine, rushed to hospital not being able to breathe. By that afternoon, sedated, ventilated and on life support. Kept alive on life support for 8 days. On day 8 we were allowed to spend 2 hours with him and made the decision to turn his ventilator off. His heart was too damaged for survival they said. He took his last breath on Tuesday the day after the removal of the ventilator. Consultant said it was coincidence about him becoming ill and the vaccine. I'm not so sure. Death certificate reads total heart block and pneumonia- natural death. How? He had nothing wrong with his heart the MRI showed that! How did he get a totally blocked heart between 1st vaccine and 2nd!? 🙄

Edited to add: U.K.

My heart is broken. This is a pain I knew I would have to face one day and I knew it would be one of the hardest things to face. We had to say "see you later" to my dad yesterday. He was one of my absolute favorite people and he knew it. He was my best friend. He was the one I would call if I was going through something like this and I would say "Dad, what am I supposed to do" I would just call sometimes to hear his voice. I will miss his voice. He was an amazing dad and an amazing grandpa. People want to know what happened. I will tell you so you know, but we are processing through this. He got the vaccine yesterday morning, had a headache after so he laid down to take a nap and he never woke up.

Detroit Free Press

Macomb County man, 90, dies after COVID-19 vaccine

Daniel Thayne Simpson, a retired accountant from Chesterfield Township who served in the Navy during the Korean War, got his first dose of the Moderna COVID-19 vaccine on Feb. 3.

The next day, Simpson, 90, was dead.

"He told my brother he was getting it and he had a sticker showing that he got it," William Simpson of Ann Arbor told the Free Press. But then, he stopped returning phone calls.

"We were assuming he felt tired or something and went to bed early and never woke up," William Simpson said. "My brother Dan went over as he often does at 5 in the evening the next day. ... He found my father dead."

** I'm hoping to spread awareness on possible complications

originally I was going to post my excitement on my second vaccine. Don't get me wrong I took the risk because I was anxious about it covid. I also wanted to see my mom & didn't want to risk giving her covid. I didn't know that the vaccine is actually very risky for people with underlying conditions. my mom passed away on Friday... 1 week after getting her first Moderna vaccine. Her symptoms started the night she got her vaccine (seems to be exactly the same timing the rest of us start getting symptoms). She was a diabetic, had heart disease & kidney disease but all managed and not showing signs of sickness there. NIGHT one her blood sugar dropped and she passed out. We googled and it looked like in rare cases the vaccine could effect blood sugar of diabetics. Her dr told her to just change her insulin until symptoms subsided. Then her blood sugar was high for 2 days (Then it balanced). THEN she was very nauseous and throwing up for 2 days (then that stopped) THEN she had shortness of breath for 2 days. Nothing to call the ER. She thought it was vaccine symptoms that would go away. She passed Friday peacefully.

I've been on daughter bear hunt to find a pathologist that can determine the vaccine caused my moms passing. I keep hitting walls. Apparently vaccine deaths can't be traced. which is a bit of a problem you think? I reported it to VAERS which is CDC & FDA but they won't do autopsy (guessing now because vaccine is not conclusive in findings). Medical examiner is doing a covid test on mom but she was isolating until vaccine so she could see me & my girls. When I called my moms pharmacist to cancel her prescriptions he told me he'd heard of 5 others RECENTLY passing after vaccine. Families are left to pay for autopsy themselves (5k) a cause of death is normally determined based on an educated guess (who

My mom consented to the Pfizer CV19 vaccine on 1/4/21 and passed away on 1/17/21 🥺❤️

She tested negative for covid all of 2020 and tested negative the morning of 1/12/21.

On 1/14/21 she tested positive and was moved to the skilled nursing home's covid unit. Her lungs were clear. She had a slightly elevated temperature.

A couple days after my mom received the CV19 vaccine, she stopped eating and drinking. Interestingly, her doctor was never told she received the vaccine even after she died. I was the one to give him that information 🥺

My sons grandpa had the second shot yesterday morning and my 8 yr old son stayed the night there last night. This morning him and his grandma found him lying on the floor unable to move his arms or legs or speak. They took him to the hospital by ambulance and said they are running tests. Anyone hear of these types of reactions? Or was it just a coincidence?

Bethannie Ann - Hearts For Healthcare Workers. 2 February 2021

My mom had her 1st Covid vaccine this past Thursday. She woke up at 1am today with a baseball sized bruise. Went back to bed got up around 7am. Here's some pictures of the progression that followed. Last picture was taken at 5:30pm. She did f/u with her pcp, had labs drawn, and has an u/s of her arm ordered for tomorrow. Has anyone seen anything like this happen? Arm is very swollen as

As I posted two days ago, my brother-in-law, 83 and with diabetes, got his second Pfizer vaccine the first week in February. He was hospitalized for shortness of breath and getting oxygen. Today's update: He was given a pacemaker. The official line was that the pace of his heart was not quite right, and they were unable to adjust it in the hospital, causing all this water retention. No big deal, he will be home tomorrow. But when I looked it up, that's not quite the story. When atrial fibrillation causes water retention, the indication is heart failure. Are there any medical professionals on this list who can confirm this?

My son's father was just taken to hospital in ambulance with massive pain, couldn't lift arms, couldn't walk, after a 2day flare of gout 10 days after 1st Moderna shot which his new girlfriend/her family convinced him to take. [His 1st 24 hrs after the shot were miserable too — a 102 degree fever & pain everywhere.] He's 53.

Hi had my jab Thurs night, yesterday I couldn't move out of bed all day. Shivering & freezing then burning up & sweating, chest pain (left side), pains in eyeballs, ears, head & legs, feeling sick. Today I have kidney pain & chest pain in right side. I know the flu symptoms are normal but is chest pain?

I got MODERNA, 1st shot fine. After 14 hours of 2nd shot, passed out on floor. Had shaking and speech stammering. Chills, fever set in for -4 days. Very weak for days, dr. Did xrays, MRI to make sure I did not have a concussion from passing out. All came back ok. 2 days later, no improvement, another shaking stammering incident 911 called, in hospital for 4 days they could not find anything wrong. I am still extremely weak and fatigued. How long can side effects lasts?

- Anaphylaxis is a severe and life-threatening allergic reaction that can occur after vaccination,

CDC: More than 5,000 COVID-19 vaccine recipients have reportedly suffered "health impact event"

DATED: DECEMBER 30, 2020 BY SHARYL ATKISSON — 221 COMMENTS

- Moderna reports higher risk of common side effects
- 5,052 suffered a "health impact event" as of Dec. 19
- CDC defines "health impact event" as one that renders a patient "unable to perform normal daily activities, unable to work, required care from doctor or health care professional"
- That's a rate of about 2.3% of vaccine recipients
- CDC says a severe allergic reaction, anaphylaxis, was reported
- It's impossible to know how effective the vaccines are beyond the number of days they've been given to humans.
- It's also impossible to know this soon what are the potential long term side effects, if any.

13 Israelis suffer FACIAL PARALYSIS after taking Pfizer Covid jab, amid influx of reports detailing adverse effects

16 Jan, 2021 14:52

At least 13 Israelis have experienced facial paralysis after being administered the Pfizer Covid-19 vaccine, a month after the US Food and Drug Administration reported similar issues but said they weren't linked to the jab.

Are we just now recognizing the danger of PEG? After the rollout?

Suspensions grow that Pfizer's COVID vaccine nanoparticles trigger allergic reactions

The U.S. National Institute of Allergy and Infectious Diseases (NIAID) convened several meetings last week to discuss COVID-19 shot allergic reactions with representatives of Pfizer and Moderna, independent scientists and physicians, and the Food and Drug Administration (FDA), reports *ScienceMag*.

The magazine, whose COVID-19 reporting is supported by the Pulitzer Center and the Heising-Simons Foundation, said severe allergy-like reactions in at least eight people who received the COVID-19 vaccine produced by Pfizer and BioNTech over the past 2 weeks may be due to a compound in the packaging of the messenger RNA (mRNA) that forms the vaccine's main ingredient, scientists say. A similar mRNA vaccine developed by Moderna, which was authorized for emergency use in the United States on Friday, also contains the compound, polyethylene glycol (PEG).

"PEG has never been used before in an approved vaccine, but it is found in many drugs that have occasionally triggered anaphylaxis—a potentially life-threatening reaction that can cause rashes, a plummeting blood pressure, shortness of breath, and a fast heartbeat. Some allergists and immunologists believe a small number of people previously exposed to PEG may have high levels of antibodies against PEG, putting them at risk of an anaphylactic reaction to the vaccine," the paper noted.

Meanwhile, an Israeli law firm has sent a letter Health Ministry Special Events coordinator Firas Hayek with a demand to reveal all [vaccine injuries](#) and damages before Israel can pass legislation regarding mandatory vaccination.

The Law Firm of Sachs, David, Price, and Hegdich wrote: "Testimonies from within society have accumulated of severe incidents that necessitated emergency medical care for those who vaccinated, evacuation to the emergency room, hospital stay, [or death](#) within a close time frame from the vaccination.

The COVID-19 vaccine, however, according to VAERS, shows 1 death reported per 35,000 shots or 10,000 completed vaccinations (so far), a 300-900 greater likelihood. The Center for Disease Control (CDC) maintains there is "no link" between the vaccine and the deaths.

Some of these vaccine injuries will be life-long and devastating

The coronavirus vaccine developed by Pfizer and BioNTech has apparently caused a number of side-effects not anticipated by the producers, a department manager at Sheba Medical Center in Tel HaShomer said Tuesday.

Professor Galia Rahav, chief of the Infectious Disease Unit and Laboratories at the Sheba Medical Center, spoke with Kan Reshet Bet Tuesday about the newly-discovered side-effects some people have reported experiencing after receiving the Pfizer-BioNTech vaccine.

The new side-effects range from paraesthesia – a nerve condition causing a tingling sensation or ‘pins and needles’ – to facial nerve paralysis.

“When we noticed this and spoke with [the company], they started to get reports about this,” said Rahav.

“At the beginning, they said that it was just hysterical women,” but it doesn’t seem that way, because we’re seeing this with men as well.”

Prof. Rahav emphasized that the side-effects are likely temporary, and that it is not yet certain that the vaccine caused the reactions. But, she added, since the vaccine is new “we need to examine it, to learn, and to observe.”

“We’re just now learning about the effectiveness of the vaccine in real life. In real, day to day life, you learn different things. The effectiveness is a little different. When you vaccinate 2.5 million people in one shot, obviously we’re going to see different things happening.”

Interesting that Pfizer ignored the initial reports of this side effect because... "hysterical women."

Hamilton PSW says allergic reaction to COVID-19 vaccine led to fainting, seizures and CPR

Bobby Hristova - CBC News - Posted: Dec 30, 2020 11:56 AM ET | Last Updated: December 30, 2020

Deborah Tilli, 27, says she accepted the possibility of death while suffering a severe allergic reaction after receiving the COVID-19 vaccine. She says she feared her two daughters, ages seven and four, would be left without a mother. (Submitted by Deborah Tilli)

Tilli says the paramedic checked her vitals and noticed her heart rate was high. She received a Benadryl shot and it seemed to work for a few minutes. But the symptoms returned and worsened, she says. "The supervisor from the paramedics was there and he just said 'OK, let's give her the EpiPen,'" Tilli said.

"Within a minute, I just said, 'Something doesn't feel right in my body,' and I remember just passing out and leaning over to the right."

Dave Thompson, superintendent of the local paramedic service, confirmed to CBC News that Tilli was taken to hospital in stable condition.

Tilli says when she woke up, she was told she suffered seizures and needed CPR for a brief period. She doesn't remember much during the reaction, but says one moment sticks out — accepting the fact that she could die.

"There was a moment where, I don't want to say I gave up, but I was just like 'It is what it is.' ... [Days later] when I was in bed the other night, I was thinking, 'What if I left my two girls without a mother?'" Tilli said.

Even the very young are experiencing deadly reactions

I'm a 21 year old CNA at a nurs home i was working and completely healthy i got told to go get the vaccine (from peer pressure bc i didn't want it) talk to a lady told her i had seizures in the past i had a cold and have allergies to shellfish amoxicillin and penicillin (SHE CROSSED THEM OFF AND PUT N/A! ON MY CONECENT FORM!) I took the vaccine at the 12:02 on Jan 8 i walk around and made my way to my seat and immediately felt my heart racing getting hot and dizzy i tried everything to calm my heart down and nothing worked i put a cold water bottle on my head and watched my Apple Watch to see how high my heart rate was it was 176 when i checked that's when i new something was wrong i stood up to get help and i just collapsed. I couldn't move after my hands and legs seemed paralyzed my left side of my face was all pins and needles feeling. They say i had two seizure like eps i was throwing up and screaming in pain. I then had two epi pens in the left leg i couldn't feel it at all Bc my legs couldn't feel anything my legs where completely numb and well paralyzed the emts came i was extremely tired and weak and hurt ER i noticed that my feet where purple we tried to plop them up they would change in color back to normal but still freezing cold and would turn purple right when i put them down. It's come to the point of painful and pins and needles feeling is worse it's been worse on the left then the right the whole time i can't walk without support and my walker and it's very painful. I went to Boston hospital to get my feet checked out since they are purple and now i need to get a biopsy done to  feet. I reported it to Pfizer and they will be calling my in the next few days i was told

Two different men both in critical condition both 36 hours after shot

My dad got vaccinated... 36 hours later he was in the hospital with heart failure. We thought we were going to lose him.

Me: Dr Cardiologist (DC), what's wrong with our dad?

DC: Well, at first he had all the symptoms of COVID, but he tested negative. Then we discovered he had heart failure.

Me: How bad was it?

DC: Your dad was very sick. We didn't think he would make it the first night.

Me: So what happened to his heart?

DC: Well, his arteries are clear and there's no blockage. So it's hard to say. We did find 2 liters of fluid we drained from his lungs that we think is secondary to the heart. And there's no infection.

Me: So what caused the heart failure and fluid in his lungs?

DC: We still don't know.

Me: Could it have been the experimental vaccine he received about 36 hours earlier...?

DC: Oh, no.

Me: Why not?

DC: There's no evidence for that.

Me: And you confirmed my dad doesn't have diabetes, metabolic syndrome or any other comorbidities, correct?

DC: Correct.

Me: So what caused him to have sudden heart failure? And what explains why he is now doing so much better?

DC: We still aren't sure.

Me: And you're sure it wasn't the vaccine?

DC: Yes.

Me: How can you be sure?

DC: It's just not.

What has to happen for something to be considered, even as an association (not causation) an adverse reaction in the reporting data?

I'm sensing things are likely not being recorded or documented accurately in the medical community.

Primary

I cared for a previously healthy patient yesterday who came in with a massive intraparenchymal hemorrhage about 36 hours after receiving his second dose of the Pfizer vaccine. Poor guy had complete left sided hemiparesis and total unilateral left sided neglect. He was vomiting secondary to the increased intracranial pressure and all he kept repeating was "I'm ok, I'm ok, I got the vaccine. I got both doses of the vaccine." Intubated, ventilated, emergency ventriculostomy, mannitol, anti-seizure meds. His prognosis is abysmal. Was it related to the vaccine? Don't you dare ask that question!!!

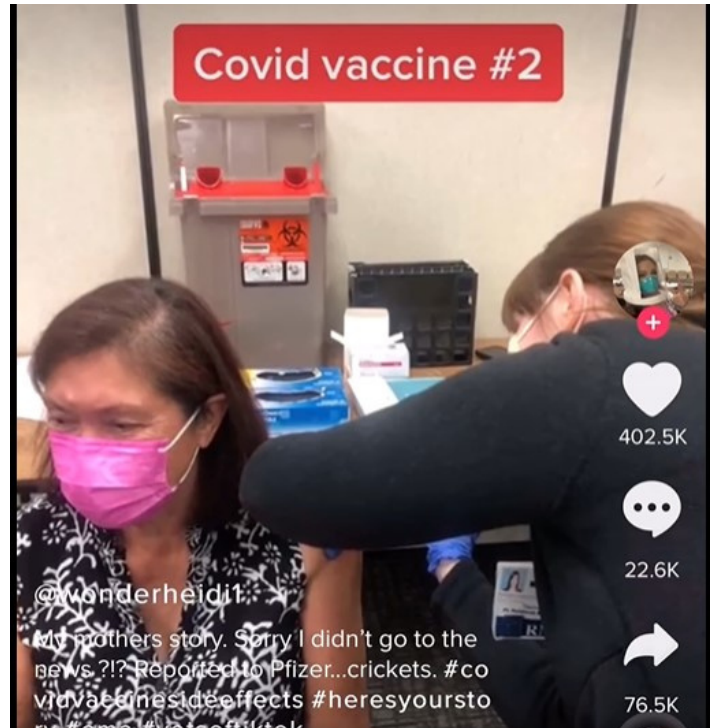

Wonder if he will show up in the VAERS database. I Keep up what you do. You are one of the only islands of sanity in all this.

Dr. [REDACTED]

Please don't publish my name. I'll lose my job within

This vibrant, 65 year old retired nurse, suffered a thrombotic stroke 8 days after her second shot.

Her daughter has reported it to Pfizer but has yet to receive a response.

Almost all cases of disseminated intravascular coagulation (DIC) or cerebral venous thrombosis (CVT) after receiving the AstraZeneca vaccine were among women under age 55. Nine of these individuals died, according to the EMA statement.

Andhra Pradesh ASHA Worker Dies After Receiving Covid-19 Jab; Unions Protest

Promila Devi, 55, a frontline health worker died due to serious complications she developed after getting vaccinated for Covid-19 at Hamirpur district in Himachal Pradesh.

Confirming about the death, Dr Janak Raj, Senior Medical Superintendent, Indira Gandhi Medical College, Shimla said the patient was shifted to IGMC from Dr Rajendra Prasad Medical College, Tanda (Kangra) only a few hours before she died.

After initial treatment and reviewing her condition, she was rushed to Tanda, where he was treated for her kidney failure. She was tested for Covid-19 also she was negative. She was also on ventilator support. As condition became precarious on Saturday, she was brought to IGMC Shimla," he said.

Chief Medical Officer (Hamirpur) Dr Archana Soni said the death of the Anganwadi worker after vaccination is a matter of concern. The higher authorities in the government have been appraised of the circumstance.

Dr Janak Raj released a letter written by union Additional Secretary (Health) Manohar Agnani asking the state governments to take strict measures after any death following vaccination of the frontline workers in the country.

ASHA workers staged a demonstration in front of the GGH demanding that a compensation of Rs 50 lakh be paid to the deceased's family.

Moradabad: Ward Boy Dies 30 Hours After Taking Covishield, ACOM Denies Vaccine Caused Death

46-year-old Mahipal Singh, a ward boy at the Moradabad district hospital died about 30 hours after he received the Covishield vaccine. While his family members have alleged that he fell sick only after receiving the vaccine, Additional CMO of Moradabad district, Dr Dinesh Kumar Premi, while speaking to Outlook, said that Singh died due to a heart attack and that his death has nothing to do with the vaccine.

Which vaccine was he administered and when?

He was administered Covishield on January 16 at 1 PM at the District Main Hospital. He was kept in the hospital for observation for some time as we did with all the other vaccinated individuals. He didn't show any symptom of any side effect. At the time of his release from the hospital, he was completely fine and he had neither any fever nor any rashes or anything

Then in the evening, he developed chest pain again and faced breathing issues. His family rushed him to the district hospital. He was admitted in the emergency ward and the doctors found him dead. He died on the way to the hospital.

Anganwadi Worker Dies After Covid-19 Vaccination, Govt Orders Probe

The 44-year old ASHA worker complained of severe headache and fever on January 22, three days after she took a shot of the coronavirus vaccine.

"We first took her to a private hospital and later shifted to the GGH as her condition worsened. She was a very fit person and rendered tireless service during Covid-19 time," the ASHA worker's brother said.

19 health workers dead after COVID-19 vaccination; health experts demand investigation

The COVID-19 vaccination drive was kicked off on January 16 in India. Since then, at least 19 health workers have died post-vaccination. Doctors and public health experts write to the health ministry, demanding an investigation into the deaths.

On February 1, 47-year-old Mannu Pahan, a health worker from Ranchi in Jharkhand, died within 48 hours after being vaccinated against COVID-19. He died at the Medanta Hospital and his body has been sent for a post mortem.

Pahan is one of the 19 health workers in the country to lose his life after receiving the COVID-19 vaccination since the launch of COVID-19 immunisation drive on January 16.

While the government has denied any connection between the deaths and the vaccine, the country's public health officials, wrote to the Union ministry of health and family welfare on January 31, raising questions and demanding an immediate investigation into the deaths.

The letter also demanded that the minutes of AEFI committees formed at the national, state and district levels on adverse incidents arising post-vaccination, be made public. The letter drew attention to several facts: the death of health workers has occurred within a few hours to up to five days after taking COVID-19 vaccine; the deceased were aged between 23 and 56 years; media reports highlighted cardiovascular problems or brain trauma as the cause behind each of the deaths;

"So far, most of the cases of COVID-19 vaccine deaths have reportedly been due to cardiovascular and brain trauma. All these groups need to be examined immediately so that, at least, the reasons behind it are known," Amar Jesani, an independent consultant, researcher and teacher in bioethics and public health told *Gaon Connection*. He is also editor of *Indian Journal of Medical Ethics*, and one of the signatories of the letter. Jesani urged that the investigations be made public so that

Vaccination in Israel: Challenging mortality figures?

Mordechai Sones, Feb 18, 2021

A front-page article appeared in the *FranceSoir* newspaper about findings on the *Nakim* website regarding what some experts are calling "the high mortality caused by the vaccine."

The paper interviews University of Aix-Marseille University Faculty of Medicine Emerging Infectious and Tropical Diseases Unit's Dr. Hervé Seligmann and engineer Haim Yativ about their research and data analysis. They claim that Pfizer's experimental shot causes "mortality hundreds of times greater in young people compared to mortality from coronavirus without the vaccine, and dozens of times more in the elderly, when the documented mortality from coronavirus is in the vicinity of the vaccine dose, thus adding greater mortality from heart attack, stroke, etc."

Dr Hervé Seligmann works at the Emerging Infectious and Tropical Diseases Research Unit, Faculty of Medicine, Aix-Marseille University, Marseille, France. He is of Israeli-Luxembourg nationality. He has a B. Sc. In Biology from the Hebrew University of Jerusalem, and has written over 100 scientific publications.

FranceSoir writes that they follow publications, data analyzes, and feedback from various countries on vaccination, and have therefore taken an interest in the *Nakim* article, asking to interview them in order to understand their analysis and its limitations.

The authors of the article declare they have no conflicts or interests other than having children in Israel.

After a presentation, the authors discussed their data analysis, the validations carried out, limitations, and above all, their conclusions that they compare with data received via a Health Ministry Freedom of Information Act request.

Their findings are:

- There is a mismatch between the data published by the authorities and the reality on the ground.
- They have three sources of information, besides the emails and adverse event reports they receive through the Internet. These three sources are Israeli news site *Ynet*, the Israeli Health Ministry database, and the U.S. federal Vaccine Adverse Event Reporting System (**VAERS**) database.
- In January 2021, there were 3,000 records of vaccine adverse events, including 2,900 for mRNA vaccines.
- Compared to other years, mortality is 40 times higher.
- On February 11, a *Ynet* article presented data related to vaccination. The authors of the *Nakim* article claim to have debunked this analysis based on data published by *Ynet* itself: "We took the data by looking at mortality during the vaccination period, which spans 5 weeks. By analyzing these data, we arrived at startling figures that attribute significant mortality to the vaccine."
- The authors say "vaccinations have caused more deaths than the coronavirus would have caused during the same period."
- Haim Yativ and Dr. Seligmann declare that for them, "this is a new Holocaust," in face of Israeli authority pressure to vaccinate citizens.

"Our reanalyses of these data explain why during the massive vaccination project initiated mid-December 2020 during a confinement, daily new confirmed COVID-19 cases failed to decrease as they do during confinements, and, more importantly, why numbers of serious, critical, and death cases increased during that period that covered at least one month. From mid-December to mid-February (two months), 2,337 among all Israeli 5,351 official COVID-deaths occurred. Our analyses indicate orders of magnitude increases in deaths rates during the 5-week long vaccination process, as compared to the unvaccinated and those after completing the vaccination process. Presumably, asymptomatic cases before vaccination, and those infected shortly after the 1st dose, tend to develop graver symptoms than those unvaccinated.

"The *Ynet* article is organized in an exciting way and uses data provided in an erroneous way by the Ministry of Health. It is unclear whether this was intentional to prove the vaccine's efficiency or if this was done erroneously because the provided data were misunderstood. Note that in Israel, all vaccines are from Pfizer.

"The data in the table, rather than indicating the vaccine efficacy, indicate the vaccine's adverse effects," the authors conclude.

Gibraltar is an interesting case study on safety.

The colony had only 17 COVID deaths from March 2020 - Jan 9, 2021

Yet they had 53 deaths within 10 days of the vaccine rollout.

Expatica.com reported that the injections started on January 9th, and that by Sunday night January 10th, 5,847 doses had been administered.

Gibraltar began rolling out its vaccination programme on January 9 using the Pfizer vaccine and by Sunday night had administered 5,847 doses — covering around 17 percent of the population. ([Full Article.](#))

The [Government of Gibraltar](#) reported that as of January 10th, just one day after the injections started, 4 people immediately died:

53 dead in Gibraltar in 10 days after experimental Pfizer mRNA COVID injections started

Gibraltar is a British Colony at the southern tip of the Iberian Peninsula attached to the country of Spain. It's population is just over 30,000 people, and it is best known for its huge "rock," the "Rock of Gibraltar."

I have been contacted by residents in Gibraltar stating that 53 people have died in 10 days immediately following the roll out of injections of the Pfizer mRNA COVID injections, and calling it a "massacre."

Local media reports confirm the deaths, but blame them on COVID, and not the COVID injections.

However, prior to the roll out of the injections, it is reported that only 16 people in total died "from COVID" since the beginning of the "pandemic" about a year ago.

A Kevin Rushworth [reported](#):

Tiny Gibraltar Shines Huge Light on Vaccine Deaths

Ever since the epidemic began, sorting genuine Covid deaths from others has been a major issue. Now we have the added problem of vaccines in the mix. The UK now allegedly has the highest daily "Covid death" rate ever. Even higher than the "First Wave," in spite of the substantial degree of herd immunity that has inevitably accrued since the beginning. This atypical "Second Wave" coincides with the vaccine roll-out. Are the two connected?

Gibraltar, normally called simply "Gib," provides a very clear picture. This tiny British Colony, barely three miles long, appended to the South coast of Spain, has only 32,000 residents. It had suffered relatively little from the epidemic before the 9th January this year, with only seventeen deaths for the whole period. The death rate was well down the Deaths per Million League Table. This was not due to isolation, since Spanish workers have continued to pour into Gib every morning, and back out every evening.

Why are healthcare workers & servicemembers declining the COVID vaccine in record numbers?

Vaccine rollout hits snag as health workers balk at shots

By BERNARD CONDON, MATT SEDENSKY and CARLA K. JOHNSON an hour ago

The desperately awaited vaccination drive against the coronavirus in the U.S. is running into resistance from an unlikely quarter: Surprising numbers of health care workers who have seen firsthand the death and misery inflicted by COVID-19 are refusing shots.

It is happening in nursing homes and, to a lesser degree, in hospitals, with employees expressing what experts say are unfounded fears of side effects from vaccines that were developed at record speed. More than three weeks into the campaign, some places are seeing as much as 80% of the staff holding back.

"I don't think anyone wants to be a guinea pig," said Dr. Stephen Noble, a 42-year-old cardiothoracic surgeon in Portland, Oregon, who is postponing getting vaccinated. "At the end of the day, as a man of science, I just want to see what the data show. And give me the full data."

Germany has more than 1 million Covid-19 vaccines unused in storage

"We are working quite hard on this and trying to convince people to accept the vaccine and really to rebuild the trust in the vaccine," one official said.

Ukraine throws away unused COVID-19 shots as doctors skip their own vaccinations

Los Angeles Times

Some healthcare workers refuse to take COVID-19 vaccine, even with priority access

At St. Elizabeth Community Hospital in Tehama County, fewer than half of the 700 hospital workers eligible for the vaccine were willing to take the shot when it was first offered. At Providence Holy Cross Medical Center in Mission Hills, one in five frontline nurses and doctors have declined the shot. Roughly 20% to 40% of [L.A. County's](#) frontline workers who were offered the vaccine did the same, according to county public health officials.

INTERNATIONAL BUSINESS TIMES

87,000 healthcare workers in Netherlands refuse Covid-19 vaccine

The nurses consider the vaccine 'experimental' and said they don't want to be guinea pigs

At a recent hearing of the Covid-19 Extra pulmonary Inquiry committee, Dr. Elke De Klerk from the Netherlands said she supports 87,000 nurses who resolved to refuse the Covid-19 vaccine because they don't want to be a guinea pig. "We are also starting a lawsuit to bring a really large group of doctors and a really large group of nurses because we have contact with 87,000 nurses that do want the vaccine that is being prepared for us. They are not willing to be the guinea pigs."

Amid random reports of reactions to vaccine surfacing at different parts of the world, here comes a sharp refusal from thousands of healthcare workers. Around 87,000 nurses refused 'experimental' Covid-19 vaccine in the Netherlands, even as the Prime Minister Mark Rutte announced a strict five-week lockdown. Cases in the Netherlands saw a steep rise after the celebrations of Saint Nicholas' birthday on Dec 5.

North Battleford health care worker dies

Tom Thomas is remembered as an active member of his church, a gifted choral singer and a caring father and husband.

Zak Vescera
Feb 18, 2021 • 1 day ago • 2 minute read

Tom Thomas was 34 years old when he passed away yesterday at Hospital emergency room due to sudden cardiac arrest. He was a father, a husband and a son who lost his

Thomas's friend Don Paul told The Morning Edition, "Thomas worked as an aide at Saskatchewan Hospital North Battleford. Thomas believed he may have been exposed to the virus at the hospital early in February — only 24 hours after being given his first dose of a COVID-19 vaccine. By Monday, Thomas had chest pains and went to the ER. While he was waiting for the doctor to do the assessment, he had a sudden cardiac arrest and died,"

Greek Hospital Administrator Faces Criminal Prosecution for Reporting Nurse's Paralysis after Second mRNA Shot

CORFU, GREECE – A Greek nurse is now paralyzed after receiving a second dose of mRNA. The 40-year-old nurse is a mother of two and has been a nurse for 17 years.

The nurse, whose name has not been disclosed, developed a fever, followed by excruciating pain throughout her body immediately after the second shot. She was rushed to the hospital when she was unable to move or feel her lower extremities.

Michalis Giannakos, President of the Panhellenic Federation of Public Hospital Workers (POEDIN), told [Open TV](#) in the East Attica region that X-rays came back clean. The nurse is now undergoing neurological assessments.

Giannakos said the nurse "was in perfect health" prior to receiving the second mRNA shot. It is believed that the nurse developed [Guillain-Barré syndrome](#).

The neurological disease causes the immune system to attack nerves throughout the body. Giannakos said the nurse is now wheelchair bound.

Criminal charges for reporting the truth?

The Prosecution of the Court of First Instance is considering pressing criminal charges against Giannakos. Greek media outlet [Ethnos](#) is reporting that a prosecutor is investigating if Giannakos committed the crime of "[spreading fake news](#)."

His crime is expressing an mRNA adverse effect with "too much certainty."

This is what the Pfizer covid19 vaccine has done to my Mom. Everyone please pray for her. She was admitted to the hospital. And be cautious about taking the vaccine. I'm sure it is good for some people but you need to think about is this vaccine worth taking? It's not for me. Please share this post we need help finding answers

Update 1-12-21

Mom is getting even worse today and still don't have any answers from doctors as to how to fix this. Please pray for her I can't stand to see my mom this way it makes me want to cry knowing I can't do anything to help her. Please don't take the covid19 vaccine. I'm adding a 3rd video that she just sent me.

BAKERSVILLE, NORTH CAROLINA — Ms. Kristi Simmonds has been a registered nurse since 2007. Her hard work and dedication to the profession led to a clinic manager position at Kindred at Home Care Services in October. Ms. Simmonds wanted to lead by example. She received the Moderna mRNA shot on January 19, according to her Facebook page. The goal was to protect her patients and co-workers, while also demonstrating that the shots are safe. She is now warning people to exercise due diligence before getting the jab.

Ms. Simmonds throat and tongue swelled up so much that she could barely breath. She went to the hospital on January 21. Doctors prescribed her Benadryl and sent her home. Ms. Simmonds rested for four days and returned to work, thinking the worst was over. Her whole world changed that night when she got home. Ms. Simmonds started having uncontrollable convulsions and muscle spasms.

Moderna

Many front line workers are sharing their injuries on social media

This is what his wife, Jennifer, wants you to know about their experience...

"The last 8 days have been incredibly challenging. I had little interest in sharing the details of our lives publicly but through our experience is has become clear that information to help those suffering from the Covid Vaccine is minimal. Public groups to share experiences with the vaccine have been actively deleting posts describing my husbands experience as it doesn't follow the message they want you to hear.

"Before jumping in, I'd like clarify that my husband is a frontline worker in healthcare and has been serving his community in various ways for 10+ years. I'd also like to say thank you to every single individual who has reached out to my husband and I to offer comfort and support. We appreciate you.

"On December 26th my husband received the Moderna Covid Vaccine. Shortly after, he developed a slight fever and general exhaustion. The following day came with incredible challenges that resulted in my husband being bed ridden. Whole body exhaustion, incredibly high fevers, chills, headaches, nausea. He could barley pick his arm up...

"Enter Monday, 12/28. On 1,000mg of Tylenol and 800mg of Motrin (ibuprofen) he was throwing temperatures higher than 104. I brought him to a local emergency room where he was told to treat his symptoms like Covid until proven otherwise... they gave him IV fluids and sent him on his way...

"While waiting for his ultimately negative results (he does not have Covid) I called numerous urgent care centers who refused to see him, on-call doctors for ECHN who refused to provide medical advice over the phone to an ECHN patient (isn't that their job?! Said doctor also informed me 104 fevers were not dangerous and the ice packs and cold cloths we were placing on his body were "only going to make me feel better and won't do anything for him".) We were left alone with minimal guidance from professionals in the field my husband has been working in for over a decade...

"You may be thinking, why didn't you call the vaccine hotline? We did. It was our first call. They picked up and said to report symptoms online for tracking purposes and then hung up. There was no guidance for treatment, no recommendations for who to seek help from... nothing more than "I hope you feel better".

"Fast forward a bit. Symptoms continued to worsen and I ultimately brought him to a privately held highly regarded emergency room in Hartford CT for further care. Without sharing specifics, I'll share that my husband was and continues to be so incredibly ill, the hospital has been testing every potential cause for his symptoms which has included 20+ tests and counting:

- Countless X-rays,
- Multiple Ultrasounds,
- Spinal taps for meningitis, and
- Regular ongoing blood work for blood bacteria, to name a few.

"Doctors and nurses from Infectious Disease have been consulting with each other to try and best identify potential trial treatments to see what works and what doesn't. For now, he's been given anti-bacterial medication in an attempt to relieve his symptoms.

"My husband after four days still remains in the hands of caring, interested and well researched professionals who are the ONLY professionals who have taken a general interest in helping, researching and trying.

"At the end of the day, I am beyond thankful for this privately held highly regarded Hartford based hospital but am very concerned about how little is being shared in regards to Covid vaccine symptoms and their severity. Two days ago I saw a big push to get the vaccine on the news with a tempting promise of a "normal fall" if we all get vaccinated... please take our experiences into consideration as you decide what is best for you and your family.

"And if you've taken some time out of your day to read through this, please SHARE. There is little information available for those suffering. And if for any reason you become increasingly ill, please seek help from the best hospital you can as soon as you can.

"If you have any questions regarding my husband, his experience or mine, please reach out. I want you to be armed with information about ALL side effects from the vaccine so you can make the best decisions for you and your families.

"With every wish that you and yours stay safe and well,
Jen."

🌟 UPDATE 🌟 1/8/2021

All - Over the last week, my husband and I have received hundreds if not thousands of messages, texts, calls and emails expressing empathy and sympathy for our living nightmare. Many of these reach outs came from family and friends. Many more came from tens of thousands of strangers simply passing along healing prayers and thoughtful words.

- Karl (my husband) and I are indeed REAL. Once we saw my initial post take off, we thought it best to lock down our personal accounts for privacy. Not that anything is truly private on social media.
- He and I are in our mid/late 20s and partake in active sports like walking, hiking, skiing and wake-boarding regularly.
- My husband has no underlying conditions, no chronic conditions, and
- Given his role as a first responder, my husband was regularly tested for COVID leading up to his vaccination and was tested numerous times after falling ill. My husband did not have and continues to be Covid free.
- Yes, it was officially determined that his illness was directly linked to the vaccine.

Our objective in sharing my husbands very real experience with Moderna, the healthcare system and "all of the things" was simple -> share so that others can make more informed decisions for themselves and their families.

We hope in some small way being open and sharing these personal details truly helped you form a more comprehensive understanding of the vaccine and its potential symptoms/risks.

After nearly 11 days of aggressive illness, 6 days and 5 nights in a privately held hospital without visitors, raging potential seizure inducing fevers, 35+ tests including regular blood draws, chest x-rays, liver ultrasounds, spinal taps, forced isolation, and a hospital bill I'm sure is five miles long....

My my husband is home. My husband is safe.

Before I start this post I am in no way feeding into conspiracies, lies etc this is from true experience and i am currently having to write this with one hand. Today I went in for my pfizer covid 19 vaccination because i work in a care home and thought it would be in best interest of my residents to have it i was offered a choice! before i had the jab i was asked if i had any allergies which i stated a mild egg allergy so after my jab i was told to stay for a 30 minute observation to see if the vaccine caused a anaphylactic reaction. I was fine apart from a mild headache i put that down to not eating properly when i got home i decided to go for a nap which lasted an hour little did i know everything was going to get worse. When i woke up i could barely feel my right side (i was vaccinated in my right arm) and could barely string a sentence together i had slurred speech and little energy. as time went on i lost complete sensation in my right arm and leg and my headache became an excruciating pain in my neck aswell, my mum suspected something was wrong and called 111 for some advice as we weren't sure if these are normal side effects. When speaking to 111 they sent an ambulance which came in 10 minutes, i was assessed and sent to the royal hospital i was then sent for a CT scan and admitted as a potential stroke bearing in mind i am 19 years old. the CT scan was clear but there was no explanation for the loss of feeling in my body I am now on a stroke ward despite no sign of a stroke to monitor if my feeling comes back and to see if i can walk again. ←

The Cass County healthcare worker got the Moderna shot in late December, blacked out and ended up on a ventilator. What happened to her is a cautionary tale, with important information everyone should know.

Chavonya Littlejohn has had a front row seat to the pandemic. She's a patient access team leader at Belton Regional Medical Center. Right after Christmas, she decided to take her shot at getting the Moderna COVID-19 vaccine.

Heather Lyons is with Tim Lyons.

Thank you all for the text, calls and messages!!!

6 hours later and my reaction is fading. Ive had IV meds to calm my system.. Ive went Afib, tachycardia (both confirmed by ekg), red, skin on fire, swollen eyes and felt plain miserable!!!

I should have listened to my first thought and passed on the vaccine.. for some its great for some its NOT! Dont let the media... people.. or anything talk you into something you have doubts on.. stick with your gut and go with it.... only you know your body!

As far as the 2nd one.. NOPE! Today has been horrible!

Just for note this was my first dose of the Pfizer vaccine.. I do have underlying medical conditions. POTs, MCAS, and Small fiber Neuropathy all a form of Dysautonomia.. but was told that the vaccine is better then Covid (which our house already had and recovered well from) .

FOX 4

Metro healthcare worker describes severe allergic reaction to COVID-19 vaccine

She woke up more than 30 hours later hooked to a ventilator in unfamiliar surroundings. Littlejohn had been taken to Research Medical Center, where she remained for three days.

Right now, the COVID-19 vaccine under its emergency use is not eligible for standard vaccine injury relief through the courts.

Instead, your only option if you get sick or even die from the vaccine is to file under what's called "countermeasures." It also reduces the time you have to make a claim, from three years with other vaccines, to one year.

My Pfizer Covid vaccine story....

I have waited to post my story out of fear of negative comments, therefore I'm asking you to please don't leave a negative comment because this is MY story. Thanks

I was excited to be chosen to receive the Pfizer Covid 19 vaccine. I have been a nurse for 20 years and love what I do for my community. I felt that everyone in my life, including my patients, family as well as myself would benefit if I receive the vaccine. After all what could be so bad about a vaccine? I believe vaccines are good. I'm healthy, No health conditions and No allergies.

On 12/18/20 around 12:30 pm, I go to the designated station pull up my right sleeve and receive the injection. I think, "okay, that wasn't so bad" and I leave to go to the waiting area for 15 minutes to make sure no reactions occur.

As I was in the elevator going down, one floor, to the seating area, I felt some dizziness. I think to myself that I just stepped wrong in the elevator. I get to the floor and was greeted from a nurse that asked me to wait for a minute to be seated. I then felt a big wave of dizziness over my body. I asked if I could sit now as I was feeling really dizzy and my legs feel like noodles. The nurse kindly said yes, sit anywhere you'd like. I sat down and she asked how I was feeling? I said kinda dizzy and weird but I don't think it's anything. A sweet girl sitting across from me said to me, "it's not in your head, I feel the same thing." We looked at each other with a bewildered

starting to feel a tickle in her throat. A few minutes later, I started feeling the same, a tickle in my throat. We both agreed that it still probably wasn't anything and maybe we needed to drink some water. Next she said to the nurse that she is feeling "fullness" in her throat. The medical personnel quickly took her away to one of two back rooms to possibly start an IV. I sat there alone when I also started feeling a "fullness" in my throat and I looked around but didn't see anyone. Then the Physician came up to me and asked me how I was feeling? I told her, "I feel fullness in my throat also," with deer in a headlight look on my face. She took me to the other room in the back, just in case we need to start an IV. An IV? For what? I was confused and thought I'm okay just feeling a little strange.

I go to the back room and blood pressure showed 187/100 and pulse 120. I was asked by all personnel if I had HTN, allergies or allergies to the flu vaccine. I said No I don't have any allergie or HTN. The fullness in my throat quickly escalated to feeling like I was being choked with extreme heat inside my body that started at my throat and waved down to my abdomen and back up. That's when I got an IV, Benadryl, solumedrol and my first injection of epinephrine. Now my blood pressure and heart rate was even higher and I start shaking uncontrollably due to the epi. I stare at the ceiling and I feel this is surreal and not me, I still don't quite realize what's happening until the medical person standing on my left side asks the physician on my right, she's having an anaphylactic reaction, isn't she? The physician on my left says, "yes, she is." The physician says to me your O2 sats are good, therefore you are breathing, so try not to be scared and keep talking to me. He holds my hand, telling me not to worry that he's got this and I'm going to be fine. He then says your voice sounds raspy. Can you try to talk louder? I could not talk any louder. As my fingertips turn blue, tears start coming down from my eyes, and my symptoms get worse. I began feeling like I was drowning. I tell him, it's getting worse and i feel like I'm drowning! That's when I got the second epinephrine injection. My body continued to shaking but even worse. Then Finally, but slowly, the strangulation halted and my symptoms started getting better. It was going away! I could breath a little better now and my voice starts getting stronger. Once I was out of danger, I realized I had been there for an hour, as I was wheeled to a hospital bed to wait for my body to regain normalcy again.

It was 8 pm when I finally left the hospital. The other girl that had the anaphylactic reaction like me went to ICU so I felt lucky to be going home. I felt awful still with a horrible headache, I couldn't walk 20 steps without being sob and my throat felt like I had been kicked. My wonderful daughter picked me up as I couldn't drive and helped me recuperate. This was by far the craziest thing that has ever happened to me in my life. I trust vaccines and medicine, and couldn't believe what happened to me. I wanted to tell MY story so you could hear a true story from someone who lived through an anaphylaxis reaction after receiving the Covid vaccine. The first pic is when I sat and felt dizzy and the second pic was right before I was discharged.

I was saved by not only great health care personnel and medicine, but but the grace of God also. Thank you God for saving my life!

Thank you for listening to my story. Please be careful if you receive the Pfizer Covid vaccine and feel free to share my story... thank you to my friends and family that helped me recuperate, I couldn't have done it without you. Love you all and feel so greatly that you are in my life. 🙏❤️

Even more deaths and injuries reported from healthcare workers in private Facebook groups

Please lift [redacted] up in prayer. I just had to leave her at Rush ER. She got the Covid Vaccine while at work yesterday and is having a serious reaction from it. She is totally numb on the left side of her body, having uncontrollable convulsions and says she is freezing. This is all that I know right now, I can't even go inside the building with her.

I'm having a moral dilemma and could use some advice. We had our Covid vaccination clinic yesterday. A resident that received the vaccine coded and died within 12 hours. While it is probably coincidental I still feel this should be reported to VAERS. I am being directed not to report by corporate. I am leaning to report regardless. What would you do? I had already put in my notice but am contemplating not working out the full 30 days

My experience with the vaccine has been the most brutal experience I can even imagine.

I went into anaphylaxis shock. I had seizures. I feel confused. I feel weird. I don't feel like my self. I had cpr done. My heart was racing one minute, to them not being able to find it. One minute I'm talking, the next I'm past over shaking and unresponsive. Once I'm finally responsive, I have no clue where I am. The walls are moving, the lights on the ceiling are going round and round in the hospital.... there's no way a vaccine can make people feel like this right?

negative. I unfortunately returned to work learning one of my residents had passed away who had got the vaccine. Of course it's being said it wasn't because of the vaccine. I am having a hard time even looking at my job the same way anymore. Most of the staff here had refused the vaccine to start with so it's hard to even compare experiences with my co-workers. I was told today that I should get another MMR

Should have listened to you. I am so sick!!!! The worst headache of my life, shortness of breath, dizzy, can't seem to warm up. I am telling you right now I am not getting a second dose. I am literally scared to go to sleep. I feel like I am going to have a panic attack every time I barely doze off. Help...

From my LNA friend who works at Dover Riverside Nursing Home: An update on the vaccine... it was administered Monday afternoon to the residents and last night during my 3-11 shift 4 residents died. That is completely unheard of. We never even have 4 go in one day.

3:11 PM

She also said:

Several of my coworkers had reactions and side effects as well. I'm not sure why they're experimenting on healthcare workers. What's going to happen when all the healthcare workers are harmed by this?

3:18 PM

Eight days after I got it, I developed edema in my feet up to 3/4 of my shins. Still battling it and it started on Christmas. At it's worst, it got to 3-4+ edema.

My cousin's daughter had the Pfizer covid vaccine. After her second one, she had a seizure. She's never had a seizure before. She's only 20 years old. She has had a

Ari [redacted]
My grandfather's doctor in his early 70s died from a heart attack within 24 hours after getting this 'vaccine'. He received Moderna but Pfizer is the same sh!t. He had no underlying health conditions and was a healthy doctor still practicing in his early 70s. His office staff are 100% convinced his heart attack was caused by this 'vaccine'. My grandparents won't be taking this shot.

< Richard C [redacted] 3d · [redacted]

Sadly my mum died at home three and a half hours post Pfizer vaccination. Had shown no adverse symptoms to vaccination prior death. Found unconscious on toilet floor but breathing prior death. Eighty eight years old, frail with underlying medical condition.

Mary [redacted]
My dad passed of Covid last year, so we couldn't wait for mom to be vaccinated. She passed away the day after receiving the booster shot, was this coincidental, I guess we will never know. But it shattered our world again ❤️

< Margie [redacted]

My uncle took the Pf on Jan 22 and he got so sick and was hospitalized and passed on the 9th of Feb. He was a healthy 84 yr old!

Adam [redacted]
Jan 14 · [redacted]

My next door neighbour got the vaccine yesterday. He's dead today. We have been told by relatives that he died of a heart attack. He was in his 70s this cannot be a coincidence.

< Feddy [redacted]

So my 27 year old daughter is in hospital with abnormal heart rhythm and burning pain in her head and spine .. and a pulse rate of 150 after receiving Pfizer vaccine .. anyone else got the same issues.. she's only 27 ?

Vicky [redacted]
My mother in law had the covid vaccine on Saturday two weeks ago rushed to hospital on Sunday next morning breathing difficulties, they have done an X-ray and found a bit of fluid at the bottom of her left lung . Breathing better though now ..until the next dose [redacted]

My mom is a nurse at a hospital and she called me today let me know 8 out of the 20 nurse staff that got the vaccine are in the ER.

Kim [redacted]

Mary Salch ...my mom passed away yesterday after receiving the 2nd shot jan 27

Tracey [redacted]

My neighbour had the Oxford one Thursday and admitted with multiple organ issues as well as water retention on Saturday. We are hoping to see if she responds to treatment. She's very poorly.

My doctor's long term receptionist died after taking the 2nd Pfizer "vaccine" on Jan 22, 2021. She was 50 years old, healthy and exercised regularly. Her best friend said she had no underlying medical problems. She was laughing at work when she left to take the 2nd "vaccine" at a hospital 1 hr away. On the way home she felt horrible and wasn't able to walk by 3:30 pm when she got home. She was taken to a local hospital where she died of blot clots in her lungs that night. Blood clots have been listed as a side effect of the so called "vaccine."

Alex Newman
@ALEXNEWMAN_JOU

Despite my pleading, dad took the covid "vaccine" a couple days ago. This morning he passed out for the first time in his life and was taken by ambulance to the ER with wild heart issues. If something happens to him, I will not rest until all involved are held accountable.

Jan 13 · [redacted]

From a friend.

"Just had an update on my cousin who is in hospital. He and his wife volunteered to take part in some American covid vaccine trials where they live in Exmoor. A couple of days later my cousin was very unwell and his lips turned blue. His wife used to be a nurse and she also said she felt a bit unwell. However.....they still flew to Tenerife where they go every year from the first week in December to the second week in February. On landing at the airport he took a turn for the worse and took a covid test which was negative. They continued to the villa and got on with their holiday. A few days later he collapsed on his way back from the shops and was taken to hospital. Still negative for covid so decided to fly back to UK. A few days after that he had to be taken to hospital. They thought he had had a heart attack and also possibly a blood clot and he was put on meds. He then got breathing problems. All this time his wife can't visit him and they have been trying to tell the doctors they think it was to do with the trials. The American trial people aren't interested and the hospital haven't contacted them to get data as they are convinced it is a heart defect. His brother phoned me this morning to say he is now on oxygen, the doctors think he has damaged the muscles in his heart and he has fluid round his lungs compressing them. They are giving him tablets to try and reduce the fluid. They said his heart is out of rhythm but they can't restart it because of the risk of his lunas. He is the fittest person you have met. He used to swimming and physical training and exercised day of his life."

Goodbye America
@BonVoyage_USA

My mother ended up with a stroke 2 days after vaccine. Beat Covid without issue. The vaccine permanently ruined what she has left in life.

Adverse Event Description

Cardiac arrest within 1 hour Patient had the second vaccine approximately 2 pm on Tuesday Jan 12th He works at the extended care community and was in good health that morning with no complaints. He waited 10-15 minutes at the vaccine admin site and then told them he felt fine and was ready to get back to work. He then was found unresponsive at 3 pm within an hour of the 2nd vaccine. EMS called immediately worked on him 30 minutes in field then 30 minutes at ER was able to put him on life support yet deemed Brain dead 1-14-21 and pronounced dead an hour or so later

Listed on the following pages are only 70 of the 1,739 deaths recorded in VAERS. Anyone can view the database via the following steps:

<https://wonder.cdc.gov/vaers.html>

1. Accept the disclaimer at bottom of page
2. Click on VAERS data search
3. In section 1, click on group results by "VAERS ID", and by "vaccine type" and by "event category"
4. Under optional measures (still in section 1) tick off "adverse event description"
5. Scroll down to section 3 and under Vaccine Products select "Covid19 vaccine" Make sure it is the only option selected. (You will have to deselect "All vaccine products" from the top of the list.)
6. Scroll down to section 5 and under event category select "death". Make sure it is the only option selected. (Don't forget to deselect "all events" from the top of the list).

Scroll to the very bottom and click send.

VAERS ID # 938118-1 AGE 51. FEMALE Vaccinated 1/5/2021. Died. 1/10/2021. Pfizer vaccine. On 1/8/2021 17:30 patient taken to ER, cerebellar hemorrhage, stroke, aneurysm.

VAERS ID # 946293-1 AGE 51. MALE Vaccinated 1/7/2021. Moderna . Became increasingly hypoxic around 1800hours on 1/7/2021. Transported to ER for acute on chronic hypoxia respiratory failure. Expired on 1/12/2021@2325 at med center.

VAERS ID # 918518-1 AGE 50. FEMALE Vaccinated 12/31/2020. Died 12/31/2020. Moderna

VAERS ID # 930910-1 AGE 52. FEMALE Vaccinated 1/8/2021. Died 1/8/2021. Patient received COVID vaccination 12:15pm. Patient was monitored for the appropriate amount of time by nursing staff. Patient passed away at 2:15pm. Moderna

VAERS ID # 933739-1 AGE 54. FEMALE. Vaccinated 1/8/2021. Died 1/10/2021. 2 days later. Staff member checked on her at 3am and patient stated that she felt like she couldn't breathe. 911 was called and taken to the hospital. While in the ambulance, patient coded. Two EEGs were given to determine that patient had no brain activity. Pfizer

VAERS ID # 923219-1 AGE 41. FEMALE Vaccinated 12/30/2021. Died. 1/1/2021. Pfizer vaccine. The patient did not experience any adverse event at the moment of inoculation with COVID-19 vaccine or the following days. On January 1, 2021, at lunch time, two days after receiving the vaccine, the patient was found unresponsive in her bed by her partner.

VAERS ID # 936805-1 AGE 25. MALE Vaccinated 12/22/2020. Found unresponsive and expired at home on 1/11. Moderna

VAERS ID # 943397-1 AGE 28. MALE Vaccinated 12/23/2020. Died 1/14/2021. Patient was found unresponsive at work in the hospital. Patient pupils were fixed and dilated. Pfizer

VAERS ID # 939050-1 AGE 32. FEMALE Vaccinated 12/28/2020. Died on 1/4/21 at 7:20am. Moderna

VAERS ID # 921667-1 AGE 39. FEMALE Vaccinated 12/29/2020. It was reported that the staff member deceased somewhere between 1/3/2021 and 1/4/2021. Pfizer

VAERS ID # 933578-1 AGE 43. MALE Vaccinated 1/8/2021. Died 1/9/2021. Moderna

VAERS ID # 937527-1 AGE 44. FEMALE Vaccinated 12/23/2020. Died on 1/4/2021. Pfizer

VAERS ID # 929764-1 AGE 45. MALE Vaccinated 12/28/2020. Died 12/29/2020. The patient was found deceased at home about 24 hours after immunization. Moderna

VAERS ID # 934968-1 AGE 54. MALE Vaccinated 1/4/2021. Died 1/6/2021. Pfizer. The patient received the vaccine on 04Jan2021, after which he started not feeling well. He went right home and went to bed. He woke up and ate a bit but not much and then was kind of pale. The patient then started to vomit, which continued throughout the night. He was having trouble in breathing. Emergency services were called, and they took his vitals and said that everything was okay, but he was very agitated; reported as not like this prior to the vaccine. The patient was taken to urgent care where they gave him an unspecified steroid shot and unspecified medication for vomiting. The patient continued to vomit throughout the day and then he was very agitated again and would fall asleep for may be 15-20 minutes. When the patient woke up, he was very restless (reported as: his body was just amped up and could not calm down). The patient calmed down just a little bit in the evening. When the patient was awoken at 6:00 AM in the morning, he was still agitated. The patient stated that he couldn't breathe, and his mind was racing. The patient's other brother went to him and he was not responsive, passed on 06Jan2021 around 10:15 AM. It was reported that none of the symptoms occurred until the patient received the vaccine.

VAERS ID # 942106-1 AGE 54. MALE Vaccinated 1/8/2021. Died 1/9/2021. Pfizer vaccine. On scene, the patient had a witnessed arrest with EMS starting CPR. He was given 3 rounds of epi without ROSC. Patient's wife, had noted patient had received covid vaccine the prior day.

VAERS ID: 924456-1, AGE 85 vaccination was administered at approx. 10:00 AM and the patient continued throughout day without any complaints or signs of adverse reaction. When the nursing staff went to the room to check on the resident patient was found unresponsive, no chest rises, noted regurgitated small amount of food to mouth left side.

VAERS ID # 996156-1 AGE 58. FEMALE Vaccinated on 02/02/2021. Moderna. Observed by vaccination team for a period of time. She reported shoulder pain radiating into shoulder blade in arm vaccine was received. Vaccination team offered ice pack to her and released back to work. 10pm that evening, she sent text to coworker that her pain was ""off the charts"" and that she had pain covering her whole left side of her body. She did not come to work in the morning and did not contact work. Well being check was performed at approximately 9am on 2/2/2021 and she was found dead in her home.

VAERS ID # 935511-1 AGE 56. FEMALE Vaccinated 1/8/2021. Died 1/9/2021. Moderna. Patient received the 1st dose of Moderna and was found deceased in her home the next day.

VAERS ID # 941811-1 AGE 56. FEMALE Vaccinated 1/4/2021. Died 1/11/2021. Moderna. Resident began having fever on 1/11/21. Resident sent to nearest ER for evaluation. Later in the evening the staff AT Medical Center called to inform staff that resident had expired @ 2230 as a result of Respiratory Failure and Sepsis.

VAERS ID # 944595-1 AGE 56. MALE Vaccinated 1/12/2021. Died 1/14/2021. Pfizer. Cardiac arrest within 1 hour Patient had the second vaccine approximately 2 pm on Tuesday Jan 12th He works at the extended care community and was in good health that morning with no complaints. He waited 10-15 minutes at the vaccine admin site and then told them he felt fine and was ready to get back to work. He then was found unresponsive at 3 pm within an hour of the 2nd vaccine. EMS called immediately worked on him 30 minutes in field then 30 minutes at ER was able to put him on life support yet deemed Brain dead on 1-14-21 and pronounced dead an hour or so later.

VAERS ID # 921768-1 AGE 58. FEMALE Vaccinated 1/4/2021. Died 1/4/2021. Pfizer.

VAERS ID # 930154-1 AGE 60. MALE Vaccinated 1/5/2021. Died 1/8/2021. Moderna.

VAERS ID # 933090-1 AGE 60. MALE Vaccinated 1/5/2021. Died. 1/9/2021. Pfizer.

VAERS ID # 941743-1 AGE 60. FEMALE Vaccinated 1/12/2021. Died 1/13/2021. Moderna. Found deceased at 3am

VAERS ID # 932898-1 AGE 61. MALE Vaccinated 12/17/2020. Died. 12/30/2020. Pfizer vaccine. The patient had an apparent cardiac arrest on 12/23/20 and was admitted to the ICU. He was taken off of life support on 12/30/20.

VAERS ID # 942085-1 AGE 62. FEMALE Vaccinated 1/2/2021. Died 1/8/2021. Pfizer. On 1/8/21 at 0615 resident was shaking. Reported all over pain. At 0850 she was not responsive.

VAERS ID # 940955-1 AGE 66. FEMALE. Vaccinated 1/11/2021. Died 1/11/2021. Pfizer. Cardiac Arrest. Patient was found pulseless and breathless 20 minutes following the vaccine administration. Received the second dose of BNT162B2. Took the first dose on 21Dec2020. MD found no signs of anaphylaxis.

VAERS ID: 926600-1, 65yo Patient did not report any signs or symptoms of adverse reaction to vaccine. Patient reported not feeling well and passed away that day.

VAERS ID: 925154-1, 84yo DEATH within 1 day, no current illness.

VAERS ID: 926797-1, 93yo had a vaccination on 12/31/2020 late morning passed away early morning 01/01/2020.

VAERS ID: 927189-1, 74yo Patient was vaccinated at 11am and was found at the facility in his room deceased at approximately 3:00pm. Nurse did not have cause of death

VAERS ID: 927260-1, 87yo No adverse effects noted after vaccination. Patient found unresponsive at 16:45 on 1/6/21. Abnormal breathing patterns, eyes partially closed SPO2 was 41%, pulseless with no cardiac sounds upon auscultation. CPR, pulse regained, patient breathing. Patient sent to ER had multiple cardiac arrest and severe bradycardia and passed.

VAERS ID: 924664-1, 92yo No current illness. At 1855, I was alerted by caregiver, resident was not responding. Per caregiver, she was doing rounds and found resident in bed, unresponsive, mouth open, observed gurgling noises. Primary caregiver observed resident at baseline and ambulating after dinner at approximately, 1800 less than an hour prior to incident. Resident received the first dose of vaccine on 1/2. Expired at 0615 per Castle RN.

VAERS ID: 923993-1, 62yo Patient was vaccinated Dec 30, 2020. Prime dose of Moderna vaccine. Observed for full 15 minutes post-injection. No complaints when asked during observation. Released. Subsequently, vaccine clinic staff learned from the patient's supervisor that patient had expired on Jan 2, 2021 at his home.

VAERS ID: 909095-1, 66yo on 12/24/2020 the resident was sleepy and stayed in bed most of the shift. He stated he was doing okay but requested pain medication for his legs at 250PM. At 255AM on 12/25/2020 the resident was observed in bed lying still, pale, eyes half open and foam coming from mouth and unresponsive. He was not breathing and with no pulse.

VAERS ID: 924464-1, 61yo coughing up blood, significant hemoptysis -- > cardiac arrest. started day after vaccine

VAERS ID: 921768-1, 58yo Vaccine received at about 0900 on 01/04/2021 at her place of work, Medical Center, where she was employed as a housekeeper. About one hour after receiving the vaccine she experienced a hot flash, nausea, and feeling like she was going to pass out after she had bent down. Later at about 1500 hours she appeared tired and lethargic, then a short time later, at about 1600 hours, upon arrival to a friends home she complained of feeling hot and having difficulty breathing. She collapsed, when medics arrived, she was still breathing slowly then went into cardiac arrest and was unable to be revived.

VAERS ID: 910363-1, 84yo Patient had mild hypotension, decreased oral intake, somnolence starting 3 days after vaccination and death 5 days after administration.

VAERS ID: 913143-1, 84yo Vaccine administered with no immediate adverse reaction at 11:29am. Vaccine screening questions were completed and resident was not feeling sick and temperature was 98F. At approximately 1:30pm the resident passed away.

VAERS ID: 913733-1, 85yo My grandmother died a few hours after receiving the moderna covid vaccine booster 1. The treating hospital did not acknowledge this and I wanted to be sure a report was made.

VAERS ID: 914604-1, 74yo Spouse awoke 12/20 and found spouse dead. Client was not transferred to hospital.

VAERS ID: 914690-1, 83yo Within 24 hours of receiving the vaccine, fever and respiratory distress, and anxiety developed requiring oxygen, morphine and ativan. My Mom passed away on the evening of 12/26/2020.

VAERS ID: 914805-1, 63yo RESIDENT CODED AND EXPIRED

VAERS ID: 914895-1, 78yo Injection given on 12/28/20 - no adverse events and no issues yesterday; Death today, 12/30/20,

VAERS ID: 914917-1, 63yo Death by massive heart attack. Pfizer-BioNTech COVID-19 Vaccine EUA

VAERS ID: 914961-1, 88yo pt passed away with an hour to hour and 1/2 of receiving vaccine.

VAERS ID: 914994-1, 90yo pt was a nursing home pt. pt received first dose of covid vaccine. pt was monitored for 15 minutes after getting shot. staff reported that pt was 15 days post covid. Pt passed away with in 90 minutes of getting vaccine.

VAERS ID: 915562-1, 88yo pt received vaccine at covid clinic on 12/30 at approximately 3:30, pt vomited 4 minutes after receiving shot--dark brown vomit, Per staff report pt became short of breath between 6 and 7 pm that night. Pt passed away at approximately 10pm.

VAERS ID: 915682-1, 85yo Resident received vaccine per pharmacy at the facility at 5 pm. Approximately 6:45 resident found unresponsive and EMS contacted. Upon EMS arrival at facility, resident went into cardiac arrest, code initiated by EMS and transported to hospital. Resident expired at hospital at approximately 8 pm

VAERS ID: 915920-1, 96yo Resident was living in an assisted living facility. She fell on 11/24/2020 and was admitted to this facility for rehab. Received vaccine 12/28/2020 in am and expired that afternoon.

VAERS ID: 918065-1, 64yo Vaccine 12/30/2020. 1/1/2020: Pronounced deceased 1/1/2020

VAERS ID: 918388-1, 65yo Vaccine 12/30/2020. 1/1/2020: Resident found unresponsive without pulse, respirations at 04:30 CPR performed, expired at 04:52 by Rescue, No acute illness at time of vaccination.

VAERS ID: 918418-1, 65yo Vaccine 12/30/2020. 1/1/2020: Resident became SOB, congested and hypoxic requiring oxygen, respiratory treatments and suctioning. Stabilized after treatment and for the next 72 hours with oxygen saturations in the 90s. On 1/3/2021 was found without pulse and respirations.

VAERS ID: 918487-1, 94yo Two days post vaccine patient went into cardiac arrest and passed away.

VAERS ID: 915880-1, 99yo Patient died within 12 hours of receiving the vaccine.

VAERS ID: 918518-1, 50yo syncopal episode - arrested - CPR - death

VAERS ID: 919108-1, 100yo Fever, Malaise, passed the day after vaccine.

VAERS ID: 919537-1, 96yo Resident exhibited no adverse events during 30 minute monitoring following vaccine administration. Resident found without pulse at 1900.

VAERS ID: 920326-1, 89yo Redness and warmth with edema to right side of neck and under chin. Resident expired on 1.1.21.

VAERS ID: 920545-1, 93yo "The resident received is vaccine around 11:00 am and tolerated it without any difficulty or immediate adverse effects. He was at therapy from 12:36 pm until 1:22 pm when he stated he was too tired and could not do anymore. The therapist took him back to his room at that time and he got into bed himself but stated his legs felt heavy. At 1:50 pm the CNA answered his call light and found he had taken himself to the bathroom. She stated that when he went to get back into the bed it was ""abnormal"" how he was getting into it so she assisted him. At that time he quit breathing and she called a RN into the room immediately. He was found without a pulse, respirations, or blood pressure at 1:54 pm.

VAERS ID: 920815-1, 58yo Found deceased in her home, unknown cause, 6 days after vaccine.

VAERS ID: 920832-1, 104yo Vaccine 12/30/2020 Screening PCR done 12/31/2020 Symptoms 1/1/2021 COVID test result came back positive 1/2/2021 Deceased 1/4/2021

VAERS ID: 921175-1, 77yo Resident received Covid Vaccine, noted after 30 mins with labored breathing BP 161/77, HR 116, R 38, T 101.4, epipen administered, sent to ER, died

VAERS ID: 921481-1, 88yo Vaccine given on 12/29/20 by Pharmacy. On 1/1/21, resident became lethargic and sluggish and developed a rash on forearms. Resident expired on 1/4/2021

VAERS ID: 921547-1, 65yo RESIDENT RECIEVED VACCINE ON 1/2/20. DEATH ON 1/4/2021.

VAERS ID: 921572-1, 87yo Resident had body aches, a low O2 sat and had chills starting on 12/30/20. He had stated that they had slightly improved. On 1/2/21 during the NOC shift his O2 sat dropped again. He later went unresponsive and passed away.

VAERS ID: 921667-1, 39yo LTCF Pfizer Vaccine clinic conducted 12/29/2020 Vaccine lead received a call indicating that a staff member deceased somewhere between 1/3/2021 and 1/4/2021. Cause of death is unknown, and an autopsy is being performed.

VAERS ID: 921880-1, 96yo The resident was found deceased a little less than 12 hours following COVID vaccination.

If you are injured by the COVID vaccine, it will be nearly impossible to receive compensation for lost work days and medical bills

If you experience severe side effects after getting a [Covid](#) vaccine, lawyers tell CNBC there is basically no one to blame in a U.S. court of law.

The federal government has granted companies like [Pfizer](#) and [Moderna](#) immunity from liability if something unintentionally goes wrong with their vaccines.

“It is very rare for a blanket immunity law to be passed,” said Rogge Dunn, a Dallas labor and employment attorney. “Pharmaceutical companies typically aren’t offered much liability protection under the law.”

You also can’t sue the Food and Drug Administration for authorizing a vaccine for emergency use, nor can you hold your employer accountable if they mandate inoculation as a condition of employment.

Congress [created a fund](#) specifically to help cover lost wages and out-of-pocket medical expenses for people who have been irreparably harmed by a “covered countermeasure,” such as a vaccine. But it is difficult to use and rarely pays. Attorneys say it has compensated less than 6% of the claims filed in the last decade.

The FDA has had 10 months to get a safety monitoring system in place, but is no where near implementing one.

02/19/21 • [BIG PHARMA](#) > NEWS

One-Third of Deaths Reported to CDC After COVID Vaccines Occurred Within 48 Hours of Vaccination

The numbers reflect the latest data available as of Feb. 12 from the CDC's Vaccine Adverse Event Reporting System website. Of the 929 reported deaths, about one-third occurred within 48 hours.

As is consistent with [previous VAERS data reports](#), 192 of the reported deaths — or 21% — were cardiac-related. As [The Defender](#) reported earlier this month, Dr. J. Patrick Whelan, a pediatric rheumatologist, warned the U.S. Food and Drug Administration in December that [mRNA vaccines](#) like those developed by [Pfizer](#) and [Moderna](#) could cause heart attacks and other injuries in ways not assessed in safety trials.

Of the 929 deaths reported since Dec. 14, 2020, the average age of the deceased was 77.8 and the youngest was 23. Fifty-two percent of the reported deaths were among men, 45% were women and 3% are unknown. Fifty-eight percent of the deaths were reported in people who received the Pfizer vaccine, and 41% were related to the Moderna vaccine.

States with the [highest reported number](#) of deaths were: California (71); Florida (50); Ohio (38); New York (31); Kentucky (41); Michigan (31); and Texas (31).

According to the latest data, [3,126 "serious" adverse reactions](#) have been reported. Adverse reaction reports from the latest CDC data also include:

- [34 miscarriages and pre-term births](#)
- 917 [anaphylactic reactions](#), 70% of which were reported after a [Pfizer](#) vaccine and 30% after the [Moderna](#) vaccine
- [Bell's palsy](#) (Pfizer 75%; Moderna: 25%)

So far, only Pfizer and Moderna vaccines — approved for [emergency use](#), but not fully licensed — are being used in the U.S.

Meanwhile, the FDA has not yet implemented systems to monitor the safety of the [experimental](#) COVID vaccines. FDA officials [told The New York Times](#) they don't expect the systems to be up and running before the Biden administration reaches its goal of vaccinating 100 million Americans — nearly one third of the U.S. population.

The U.K. has their own tracking system (Yellow Cards)

BREAKING: UK gov't says over 240 people in Britain died shortly after receiving COVID jab

The report included in its ancillary material the information that a total of 8 miscarriages have been reported

LONDON, England, February 11, 2021 ([LifeSiteNews](#)) — A U.K. government vaccine safety review has revealed that 244 people, including 8 unborn babies, have died in Britain shortly after receiving one of two coronavirus vaccines. The government has said that it does not believe the inoculations are responsible.

An extensive report produced by the U.K. government today has detailed all the suspected side effects, including death, reported by medical staff or the people who received at least one Covid-19 vaccine between early December 2020 and January 31, 2021. The two vaccines currently in use in the U.K. are the Pfizer/BioNTech and the Oxford University/AstraZeneca. They were authorized by the country's Medicines and Healthcare products Regulatory Agency (MHRA).

The MHRA monitors the safety of the vaccines as they are used on the public, and to this end they introduced a "Yellow Card Scheme" to collect reports of any suspected side effects. 20,319 Yellow Card reports, including a total of 59,614 suspected adverse reactions, were made regarding the Pfizer vaccine. 11,748 were made regarding the AstraZeneca vaccine, which was rolled out only on January 4, 2021. 72 Yellow Card reports did not specify which vaccine was used.

According to the report:

The MHRA has received 143 UK reports of suspected ADRs to the Pfizer/BioNTech vaccine in which the patient died shortly after vaccination, 90 reports for the Oxford University/AstraZeneca vaccine and 3 where the brand of vaccine was unspecified.

The report included in its ancillary material the information that 5 miscarriages were reported after the use of the Pfizer vaccine and 3 after the Oxford vaccine.

Suspected adverse reactions after receiving Pfizer/BioNTech vaccine

A total of **59,614 suspected side effects** were recorded after use of the Pfizer/BioNTech vaccine.

The [link to the Pfizer vaccine analysis](#) shows clearly that **1,437 blood disorders** have been reported after inoculation, 1,204 of them being lymphadenopathy (enlarged or swollen lymph nodes). **712 cardiac disorders** were reported, notably palpitations (303) and a speeding heart rate (230). **445 ear disorders** were reported, including vertigo (146), ear pain (122), and varying amounts of hearing loss (31).

However, there have been reports of more serious damage associated with the vaccine, notably anaphylaxis and Bell's Palsy. Now 130 "spontaneous adverse reactions associated with anaphylaxis or anaphylactoid reactions" in Britain have been reported for the Pfizer vaccine, and 30 have been reported for the Oxford vaccine. Bell's Palsy, which involves facial paralysis or weakening of the facial muscles, has been reported 99 times for the Pfizer vaccine and 15 times for the Oxford vaccine. The MHRA says that because this ailment "can also occur naturally, an association with the vaccine is not yet confirmed."

There were **224 injuries** reported, and **357 metabolic disorders**, of which 252 were decreased appetite. **8,129 muscle and tissue disorders** were mentioned, of which 2,690 were muscle pain and 1,704 were joint pain. **11,160 nervous disorders** were reported, including 5,506 headaches, 1,546 cases of dizziness, 45 seizures, 15 cases of paralysis, and 1 case of locked-in syndrome. There were **5 miscarriages** reported.

Of the **830 psychiatric disorders** reported, 162 were insomnia, 112 cases of being in a confused state, and 73 bouts of anxiety. Of the **120 renal & urinary disorders**, 35 were renal pain and 12 were urinary incontinence. There were **187 reproductive and breast disorders** mentioned, of which 31 were breast pain and 22 menorrhagia (heavy periods).

There were **2,397 respiratory disorders** reported, including 520 cases of difficulty in breathing, 483 sore throats, and 426 cases of coughing. **3,947 skin disorders** were reported, including at least 796 rashes and 776 cases of itchiness. The **676 vascular disorders** on record included 182 hot flushes.

There were **823 references to eye disorders**, including 145 reports of eye pain, 126 of blurred vision, and 5 of blindness. **6,605 gastrointestinal disorders** were reported, among them 2,889 cases of nausea, 924 cases of diarrhea, 775 cases of vomiting, and 283 cases of upper abdominal pain. Of the **19,354 "general disorders"** reported, 4,007 were cases of fatigue, 3,665 were fevers, 2,310 were chills, 773 referred to vaccination site pain, 491 were "influenza-like illnesses." There were **308 immune system disorders**, mostly hypersensitivity (146) and anaphylactic reactions (116).

Ironically, there were **1,186 reported infections**, including 308 cases (including "suspected cases") of Covid-19 itself, 231 cases of influenza, and 154 upper respiratory tract infections.

LET'S LOOK AT

THE TRIALS

The 95% effective claim by Pfizer is based on ONLY 170 trial participants.

no one in the trial was tested for the development of antibodies

Everly Report

January 31, 2021

What you need to know about the COVID Vaccine

EFFECTIVENESS:

Claim: 95% effective

What this claim is based on:

Although there were a total of 43,548 trial participants in Pfizer's phase 3 trial, their calculation of effectiveness is based on a total of 170 participants.

These 170 participants were the first to develop symptoms of COVID and test positive for SARS-CoV-2, within the two-month monitoring period starting 7 days after the administration of the second vaccine.

From the chart below, it states that of the first 170 participants to develop symptoms and test positive for SARS-CoV-2, 162 of them were placebo recipients and 8 were vaccine recipients.

This is where the "95% effective" calculation comes from.

Source: Pfizer Vaccine Insert.

However, the rest of the participants were not tested for infection, nor were they tested for the development of antibodies, which is the endpoint typically used to measure vaccine effectiveness.

The published phase 3 clinical trial states the following "Limitations and Remaining Questions":

LIMITATIONS AND REMAINING QUESTIONS

Further study is required to understand the following:

- Safety and efficacy beyond 2 months and in groups not included in this trial (e.g., children, pregnant women, and immunocompromised persons).
- Whether the vaccine protects against asymptomatic infection and transmission to unvaccinated persons.
- How to deal with those who miss the second vaccine dose.

Note: Remaining questions include "whether the vaccine protects against asymptomatic infection and transmission".

Table 6: Vaccine Efficacy – First COVID-19 Occurrence From 7 Days After Dose 2, by Age Subgroup – Participants Without Evidence of Infection and Participants With or Without Evidence of Infection Prior to 7 Days After Dose 2 – Evaluable Efficacy (7 Days) Population

First COVID-19 occurrence from 7 days after Dose 2 in participants without evidence of prior SARS-CoV-2 infection*			
Subgroup	Pfizer-BioNTech COVID-19 Vaccine N ^a =18,198 Cases n1 ^b Surveillance Time ^c (n2 ^d)	Placebo N ^a =18,325 Cases n1 ^b Surveillance Time ^c (n2 ^d)	Vaccine Efficacy % (95% CI)
All subjects ^c	8 2,214 (17,411)	162 2,222 (17,511)	95.0 (90.3, 97.6) ^f
16 to 64 years	7 1,706 (13,549)	143 1,710 (13,618)	95.1 (89.6, 98.1) ^g
65 years and older	1 0.508 (3848)	19 0.511 (3880)	94.7 (66.7, 99.9) ^g
First COVID-19 occurrence from 7 days after Dose 2 in participants with or without evidence of prior SARS-CoV-2 infection			
Subgroup	Pfizer-BioNTech COVID-19 Vaccine N ^a =19,965 Cases n1 ^b Surveillance Time ^c (n2 ^d)	Placebo N ^a =20,172 Cases n1 ^b Surveillance Time ^c (n2 ^d)	Vaccine Efficacy % (95% CI)
All subjects ^c	9 2,332 (18,559)	169 2,345 (18,708)	94.6 (89.9, 97.3) ^f
16 to 64 years	8 1,802 (14,501)	150 1,814 (14,627)	94.6 (89.1, 97.7) ^g
65 years and older	1 0.530 (4044)	19 0.532 (4067)	94.7 (66.8, 99.9) ^g

Note: Confirmed cases were determined by Reverse Transcription-Polymerase Chain Reaction (RT-PCR) and at least 1 symptom consistent with COVID-19 (symptoms included: fever; new or increased cough; new or increased shortness of breath; chills; new or increased muscle pain; new loss of taste or smell; sore throat; diarrhea; vomiting).

* Participants who had no evidence of past SARS-CoV-2 infection (i.e., N-binding antibody [serum] negative at Visit 1 and SARS-CoV-2 not detected by NAAT [nasal swab] at Visits 1 and 2), and had negative NAAT (nasal swab) at any unscheduled visit prior to 7 days after Dose 2 were included in the analysis.

a. N = number of participants in the specified group.

b. n1 = Number of participants meeting the endpoint definition.

c. Total surveillance time in 1000 person-years for the given endpoint across all participants within each group at risk for the endpoint. Time period for COVID-19 case accrual is from 7 days after Dose 2 to the end of the surveillance period.

d. n2 = Number of participants at risk for the endpoint.

Up next...testing brand new mRNA technology on children as young as 6 months old...and pregnant women.

Testers are using the meningitis vax as their 'placebo' so they can eliminate know vaccine side effects (like seizures!)

Andrew Pollard, professor of paediatric infection and immunity, and chief investigator on the Oxford vaccine trial, said: 'While most children are relatively unaffected by coronavirus and are unlikely to become unwell with the infection, it is important to establish the safety and immune response to the vaccine in children and young people as some children may benefit from vaccination.

'These new trials will extend our understanding of control of SARS-CoV2 to younger age groups.'

The first vaccinations under the trial will take place this month, with up to 240 children receiving the vaccine and the others receiving a control meningitis jab.

Former Top Pfizer Scientist Michael Yeadon Claims COVID Vaccines May Cause Infertility In Women

Israel's virus czar says 1st dose proving less effective than Pfizer indicated — report

By TOI STAFF
19 January 2021, 1:55 pm | 1

Coronavirus czar Nachman Ash says the first dose of Pfizer's vaccine is turning out to provide less protection against COVID-19 than the US pharmaceutical firm had initially indicated it would, Army Radio reports.

Many people have gotten infected between the first and second Pfizer shots, he reportedly says, and it appears the protection offered by the first dose is "less effective than we had thought." The data on the protective effect against the virus of the first dose, it is estimated, is "lower than Pfizer presented," he is quoted saying.

MEMPHIS SURGEON DIES OF MIS WEEKS AFTER RECEIVING SECOND COVID VACCINE

They all received BOTH vax doses yet still caught Covid?

MEMPHIS, Tenn. — A Mid-South doctor has died of a COVID-related illness. However, he never knew he had the virus and he'd been vaccinated.

Williams, an Orthopedic Surgeon for OrthoSouth, died February 8 of multisystem inflammatory syndrome or MIS, a condition usually affecting children and attacking the immune system.

"The immune system attacks the body in many ways and causes multi-organ system failure," Threlkeld said. "It affects the heart, the gastrointestinal tract and other places."

Threlkeld says Williams tested positive for COVID antibodies, meaning he had COVID at one time, but he never knew it. And he had gotten his second COVID vaccine just weeks before his death.

A typical vaccine safety trial lasts a MINIMUM of 2 years.
Pfizer & Moderna have ENDED their safety trials after only 7 months by
allowing placebo recipients to receive the vaccine.
This eliminates all possibilities of capturing long-term adverse effects.

Chicago Tribune

Vaccine trial participants who received placebo now hop the line for the real thing from Pfizer, Moderna

By JUDY PERES
CHICAGO TRIBUNE | JAN 14, 2021

Good news for tens of thousands of volunteers in the COVID-19 vaccine trials: Many of those who received a placebo are now being offered a vaccine — in some cases, earlier than they would otherwise have been eligible.

Participants in Pfizer's vaccine study — some of whom had mounted a noisy campaign on social media — have been advised that anyone who wants one can receive the first of two shots by March 1. Participants in Moderna's vaccine trial already are getting immunized.

That wasn't always the plan, and some experts fear "unblinding" volunteers — that is, letting them know whether they got the vaccine or a placebo — could make it difficult to collect good, long-term data on the experimental vaccines, including how safe they are and when their immunity starts to wear off. But others argue it would be unfair to leave trial participants unprotected from a raging pandemic when an effective vaccine is available.

Long-Term Studies Of COVID-19 Vaccines Hurt By Placebo Recipients Getting Immunized

February 19, 2021 · 5:00 AM ET

Tens of thousands of people who volunteered to be in studies of the Pfizer-BioNTech and Moderna COVID-19 vaccines are still participating in follow-up research. But some key questions won't be easily answered, because many people who had been in the placebo group have now opted to take the vaccine.

Dr. Steven Goodman, a clinical trials specialist at Stanford University, says losing those control groups makes it more difficult to answer some important questions about COVID-19 vaccines.

"We don't know how long protections lasts," he says. "We don't know efficacy against variants — for which we definitely need a good control arm — and we also don't know if there are any differences in any of these parameters by age or race or infirmity."

Below (were) the end dates of the Pfizer & Moderna trials.

"Dec 18th 2020 – My Dad participated in the Johnson & Johnson Trial COVID vaccine shot. They promised all medical expenses paid for any complications related to COVID for the next 2 years. My Dad found security in the medical expense coverage and possibility to have access to a vaccine- that he decided to do the trial.

Dec 25th 2020 - One week later- Christmas Day – Dad was very fatigued. He felt tired right after the shot and when I spoke with him on Christmas day, I recall he sounded exhausted. Which is unlike him, especially on Christmas.

Jan 4th 2021 By the first of the year, he was very sluggish and found it hard to do his exercises that he does weekly. He always likes to stay active.

Jan 11th – 18th Asthma like symptoms, harder to get through his workouts. Very short of breath and started to be winded very easily. Low grade fevers. Hard to make it through calls at work.

Jan 25th – Dad contacted Johnson & Johnson and they did a COVID test. Results came back 3 days later as negative. They advised he has flu like symptoms and to rest and drink lots of fluids.

Jan 29th my Dad could barely walk. His legs became so weak that he shook when he walked. He thought maybe he was battling a flu and tried to keep resting through the weekend in hopes he would feel better.

Feb 1st - my mom brought him to Lake Mary Emergency room and they immediately transported him via ambulance to Advent Altamonte because of very high troponin levels.

Feb 1st – 4th -My Dad was at Advent Health Altamonte where they ran all kinds of tests and discharged him on the night of Feb 4th . Referring him to an oncologist, infectious disease Dr, cardiologist and PCP.

Feb 5th- Friday I saw my Dad at 11 AM and he could not walk and was very lethargic and sleepy. I called and made all his referral appointments and scheduled him to see his PCP first thing Monday.

Feb 6th- Saturday. I woke up at 6 AM and drove to my parents house and my Dad was completely out of it. He could not get out of bed, pick up his coffee to drink, lift his head. He did not know what year, day, month we were in. We took him to Advent Orlando and within 20 minutes they got him in and found a blood infection and swelling in brain.

Feb 20th We have been here 2 weeks today, and today my Dad started on dialysis.

I am not an anti-vaxxer by any means. But I think there should be some public awareness of the dangers of being part of a trial vaccine. Especially one that is being done in warp speed. And the chance I would recommend someone to get the Johnson & Johnson vaccine, is slim to none. They have denied any type of connection."

In 1976 the rushed-to-market Swine Flu vaccine was quickly pulled from the market...after 'only' 25 deaths.

"IN 1976,
THE US HALTED
THE SWINE FLU VACCINE
AFTER 6 WEEKS
FOR 25 DEATHS & 362 CASES OF
GUILLAIN-BARRE NEUROLOGICAL
INJURIES.

WITH CORONAVIRUS VACCINES,
(AFTER 8 WEEKS)
WE ARE ALREADY AT 501 DEATHS,
147 CASES OF ANAPHYLAXIS,
& 128 CASES OF BELL'S PALSY."
-TOBY ROGERS

LET'S LOOK AT

THE LAWS

Federal Law states employers, schools, organizations cannot mandate an EUA vaccine.

STAT

The frontiers of health & medicine

Federal law prohibits employers and others from requiring vaccination with a Covid-19 vaccine distributed under an EUA

Ever since the Food and Drug Administration granted emergency use authorization for two new vaccines, employers, schools, and other organizations [are grappling](#) with whether to require Covid-19 vaccination.

While organizations are certainly free to encourage their employees, students, and other members to be vaccinated, federal law provides that, at least until the vaccine is licensed, individuals must have the option to accept or decline to be vaccinated.

EUAs are clear: Getting these vaccines is voluntary

The [same section](#) of the Federal Food, Drug, and Cosmetic Act that authorizes the FDA to grant emergency use authorization also requires the secretary of Health and Human Services to “ensure that individuals to whom the product is administered are informed ... of the option to accept or refuse administration of the product.”

Likewise, the [FDA's guidance](#) on emergency use authorization of medical products requires the FDA to “ensure that recipients are informed to the extent practicable given the applicable circumstances ... That they have the option to accept or refuse the EUA product ...”

In the same vein, when Dr. Amanda Cohn, the executive secretary of the CDC's Advisory Committee on Immunization Practices, was asked if Covid-19 vaccination can be required, [she responded](#) that under an EUA, “vaccines are not allowed to be mandatory. So, early in this vaccination phase, individuals will have to be consented and they won't be able to be mandatory.” Cohn later affirmed that this prohibition on requiring the vaccines [applies to organizations, including hospitals](#).

Much remains unknown about the safety and efficacy of the vaccine

Even though the FDA granted [emergency use authorizations](#) for the [Pfizer/BioNTech](#) and [Moderna](#) vaccines in December 2020, the clinical trials the FDA will rely upon to ultimately decide whether to license these vaccines are still underway and are designed to last for approximately [two years](#) to collect adequate data to establish if these vaccines are safe and effective enough for the FDA to license.

The abbreviated timelines for the emergency use applications and authorizations means there is much the [FDA does not know](#) about these products even as it authorizes them for emergency use, including their effectiveness against asymptomatic infection, death, and transmission of SARS-CoV-2, the virus that causes the disease.

Given the uncertainty about the two vaccines, their EUAs are explicit that each is “an investigational vaccine not licensed for any indication” and require that all “promotional material relating to the Covid-19 Vaccine clearly and conspicuously ... state that **this product has not been approved or licensed by the FDA**, but has been authorized for emergency use by FDA” (emphasis added).

Is forcing someone to take the COVID vaccine in violation of the Nuremberg Code?

What Are The Nuremberg Code's Ethical Guidelines For Research?

The Nuremberg Code aimed to protect human subjects from enduring the kind of cruelty and exploitation the prisoners endured at concentration camps. The 10 elements of the code are:

1. Voluntary consent is essential
2. The results of any experiment must be for the greater good of society
3. Human experiments should be based on previous animal experimentation
4. Experiments should be conducted by avoiding physical/mental suffering and injury
5. No experiments should be conducted if it is believed to cause death/disability
6. The risks should never exceed the benefits
7. Adequate facilities should be used to protect subjects
8. Experiments should be conducted only by qualified scientists
9. Subjects should be able to end their participation at any time
10. The scientist in charge must be prepared to terminate the experiment when injury, disability, or death is likely to occur

As the COVID vaccine was approved as an emergency measure, it is still classified as 'experimental.' It is not FDA approved.

Therefore it violates 6 elements of the Nuremberg Code including:

Number 1 - Requiring an experimental vaccine to participate in society is in violation of the Code.

Number 3 - The Covid vaccine skipped required animal safety trials

Number 4 - 36,000 adverse reactions (including PERMANENT DISABILITY) have been recorded (in the US alone) in the first 90 days of rollout

Number 5 - 1,524 deaths from vaccine are recorded in VAERS in first 90 days of rollout (USA only)

Number 6 - The vast majority of Americans have a 99.96% chance of surviving Covid **without** a vaccine

Number 10 - No one is pulling the plug on this experimental-status vaccine even though we have thousands of deaths and permanent disabilities.
